

Kyla Topham  
Council Department Report  
April 2026

URC- Our application was approved! We now have 90 days from approval to sign the utility agreement. Randy will be presenting much more information at the meeting regarding the approval and agreement.

I also attended an URC communications meeting. Moving forward all public promotion must be approved by RMP before publication. This does not prevent us from having public meetings concerning the program, but we do need to be careful about social media and news letter info. The URC is working on a new website and other types of media that we will be able to use once approval is received.

Community Health Coalition- We will meet later in the month.

Housing- We met and discussed the latest legislative session. Trapper circle project related documents are with the attorney.

Community Development- Commemorative plaque for the pioneer cemetery is in the works. Kyndal is continuing to work on the historical tour through the app. The department is transitioning as Tom moves into his new position. There will be a fire wise community presentation on April 7 at the CCC. This is in response to community interest shown at the WUI event.

Messaging- We have a meeting scheduled later in the month. We have sent a few reminder emails to participate so that we can gather as much feedback as possible.
