 *Keeping Utah Moving*

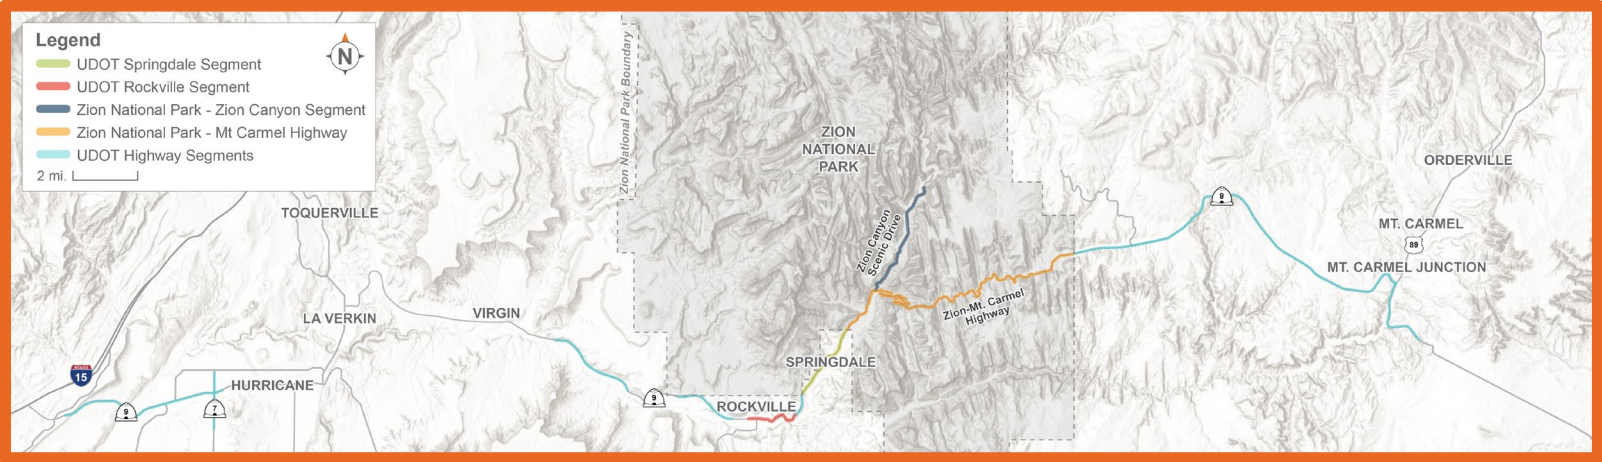

Zion Canyon Fiber Optics

**Design and Construction of Fiber
Infrastructure in a National Park**

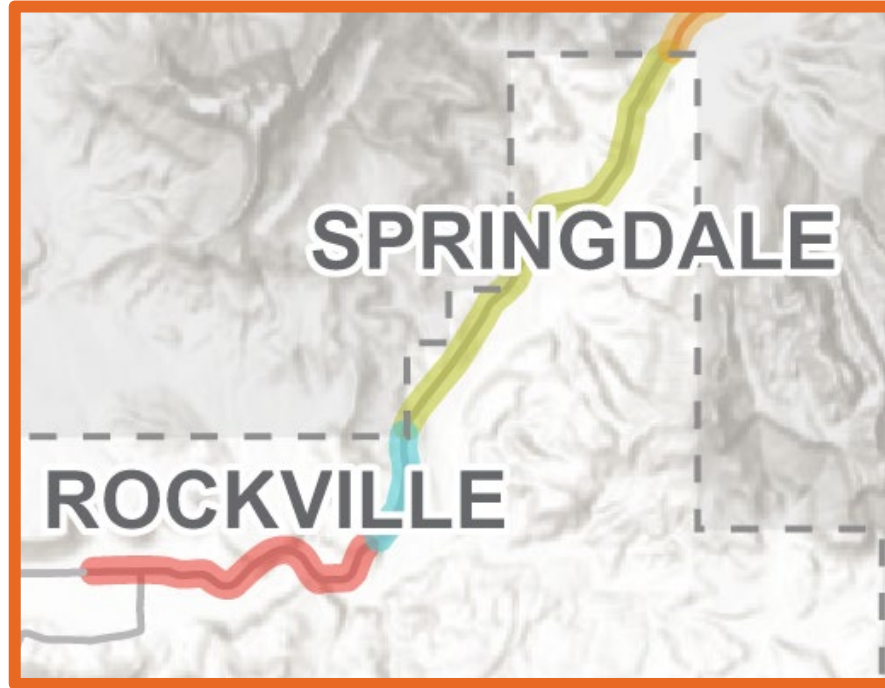

Nancy Cozzens
Ava Pecora

Project Area Map

Segment 4: SR-9 (Rockville, Springdale)

Public Involvement

- Engagement platforms/tools
 - Website, email, hotline
- Start of construction notification
 - Weekly construction updates

The graphic features the UDOT logo at the top left with the slogan "Keeping Utah Moving". To the right, it identifies the project as "State Route 9 Zion Canyon TECHNOLOGY by UDOT". Below this, a central "BENEFITS" section lists five key areas: Enhanced Connectivity (represented by a hand with signal waves), Improved Safety (a shield with a checkmark), Environmental Protection (a hand holding a plant), Strengthen Local Communities (two houses), and Public-Private Partnership (two people). At the bottom, a large QR code is accompanied by the text "SCAN TO LEARN MORE" and the URL "udotinput.utah.gov/ziontechnology". The entire graphic is framed with an orange border and a stylized mountain range at the bottom.

Where are we now?

- The Zion Canyon Fiber Optic Project received environmental clearance in late 2025.
- Construction is anticipated to complete in December 2026.

THANK YOU
