

Purpose

The Medical Cannabis Policy Advisory Board brings together patients, medical providers, industry operators, researchers, regulators, and public representatives to advise on Utah's medical cannabis laws, rules, and licensing. Created by the Utah Legislature in 2023, the board serves as a public forum for stakeholders to collaborate and improve the state's medical cannabis program.

Mission

To provide well-informed, balanced recommendations to state lawmakers and agencies that improve Utah's medical cannabis program for patients while maintaining public safety and program accountability.

Vision

A medical cannabis program where Utah patients can reliably access safe, high-quality medicine as a normal part of their healthcare, supported by sound policy that keeps pace with advancing research and real-world experience
