4/13/2026 21:37	4a. General Plan Amendment G-25-07 - George Washington Blvd & Antigua Ln	Allison Schreiber	Washington Fields	We live at the end of Rolling Ridge Lane next to the proposed commercial development. I don't understand how this land can go from low density to commercial. Our street goes directly into this area and we would greatly appreciate if you required the developer to make our street into a circle. There are several children in our neighborhood and we don't want our street a through street to the commercial area. We love the new wheels park but this has already brought so much more traffic and during busy times cars are parked on all of our streets, so that has an increase on more children in the area. Please consider our input. Thank you!
