

Public Notice: Proposal to adopt revised Mapleton City Public Works Design Standards

Mapleton City's Public Works department is proposing revisions to its Public Works Design Standards, originally adopted in 2023. The Design Standards contain requirements for public infrastructure under Mapleton City's jurisdiction, whether constructed as a City project or proposed with private development. The proposed revisions include updates to existing written standards and standard drawings, as well as additional written standards, standard drawings, and city-specific modifications to the Utah American Public Works Association (APWA) General Conditions.

The final draft of the revised Mapleton City Public Works Design Standards can be reviewed on Mapleton's website under Departments > Public Works > Engineering > Construction Standards:

https://mapleton.org/departments/public_works/engineering___development/___construction_standards.php

The proposed Design Standards update will be presented for Council approval at the:

Mapleton City Council Meeting
September 2, 2026 @ 6:00 pm
Mapleton City Council Chambers (125 West 400 North)

The meeting will include a public hearing on the proposed standards adoption.
