

Mayor James Beagley
LuAnn Johnson, Councilmember
Mike Morgan, Councilmember
Trisha Arbon, Councilmember
Brandon Garbanati, Councilmember
Stacey Hill, Deputy Clerk
Tammie Morgan, Clerk

Elisabeth Campbell, Dave Smith
Trudy Smith, Carson Morgan
Jed Pugsley, Camie Pugsley
Eric Dusteler, Tim Heyder

Mayor Beagley said I would like to welcome everybody here to our July meeting, no August meeting. Sorry, and Mike will be a little late. He said he'll be here. Mayor Beagley said Trisha Arbon is going to give the pledge, and the prayer will be done by Stacey Hill.

Trisha said I pledge allegiance to the flag of the United States of America and to the republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

Stacey said Dear Heavenly Father, we're so very grateful to be here tonight as town council members of this town. We're so very grateful for the opportunities that we have to get together and decide the things that would best benefit the town. Watch over and protect our families tonight, wherever they are, and thank you; please bless us with the rains that we need for our valleys. And we're so very grateful for everybody that supports our freedoms; watch over and protect them tonight. Especially Bud Munns as he's over in Iran. Heavenly Father, watch over and protect our troops and those that are learning.

Mayor Beagley said Okay, we'll have the acceptance of the last month. Do we have a motion to accept the agenda and acceptance of the minutes from the previous meeting for July 2026? Do I have a motion from?

LuAnn said I make a motion to accept the agenda for tonight and the minutes from the previous meeting.

Mayor Beagley said Okay, we have a motion from council. You're jumping. I got steps I got to follow. It's policy, and we've done it in the past.

Trisha said All right, go ahead.

Mayor Beagley said Okay, I have a motion from LuAnn Johnson. Do we have a second?

Trisha said Second.

Mayor Beagley said Okay. All in favor?

Everyone there said, Aye.

Mayor Beagley said Any opposed? Motion passed. Okay, Carson, be the first one.

Carson said Sorry, my turn.

Mayor Beagley said Yes, your turn.

Carson said I think my mom gave you all a copy of the picture of the map.

Tammie said Stacey did.

Carson said Then I guess we will do that first. So that we have a I don't know who it is. Her name's Emma Nelson. Who is she with? I don't know. Anyway, it's a company that's going to help us make the interactive map. So we can. It's totally free. So it'll be like the county website. You can do it in whatever. We'll put it on our website. Have a copy here. You know, it'll have, like, parcel numbers. It'll be the way it's done. Everything. We can put a lot of information on there. It's totally free until 2028, and then after that, I charge a fee because I update the information. But it's free right now.

Mayor Beagley said Okay, let me tell you about your map here. You know, no, it's not up to date.

Carson said Yes, and that's what else we were talking about. We have an updated map. I didn't get it from Carolyn.

Cody said Carolyn.

Carson said No, Carolyn. Yes. Yeah. So, but there is an updated map, as far as we know.

Mayor Beagley said No, there isn't. The last four people have been annexed into this town, or not the last four. One person and three other pieces of property to the town. It never went through. So we might have to go through the whole process again. In fact, they recommended for us to contact the lawyer, the clerk at Box Elder County, and see what we might have to do.

LuAnn asked Why didn't it go through?

Mayor Beagley said that the finished part of it never got sent to the lieutenant governor's office. Smoots is one. I've talked to him a couple of times this last week about it.

LuAnn asked Were we supposed to do that, or are they supposed to do that?

Mayor Beagley said We were supposed to do that.

LuAnn said Oh.

Mayor Beagley said And I've got a. It's over here, a copy of the Utah State Law that we need to follow whenever we annex anything in, so I'll give that to you. But I don't know how long it's going to take. I don't know for sure if we have to redo it. I've got to talk to our lawyer. We can probably text him and ask some questions. And I need to get a hold of the Lieutenant Governor's Office and ask them about this too. I just found this out yesterday.

LuAnn said Do you think they missed?

Mayor Beagley said Pardon?

LuAnn said Did they? Could they have just missed it?

Mayor Beagley said I don't know. I really don't know. Maybe I don't know.

Actually, it wasn't. See, today's Monday, right? No, Wednesday. I talked yesterday. I went to Box Elder County again and talked to a bunch of people there.

LuAnn said Okay.

Carson said, as for as this, it needs to be started.

Mayor Beagley said You can start it, but it'll have to be updated in a few weeks.

Carson said Yeah, we need the approval from you guys if we're going to go ahead and start the process.

Mayor Beagley said Okay.

Carson said For that part of it.

Mayor Beagley said Okay, great.

Trisha asked So, Jim, what are the fees associated with those annexes, and we're going to have to repay all those fees and all.

Mayor Beagley said I don't know. That's why I need to talk to the lawyer and visit the Lieutenant Governor.

Trisha said Okay, I was just curious if there was any cost associated with it.

Brandon said So do we need to make a motion? They're okay to proceed, or do we just all agree?

Tammie said I would make a motion.

Mayor Beagley said Oh, and his thing right there.

Brandon said for him to start with the map.

Mayor Beagley said Oh, for the map. Oh, okay. Do we have a motion to accept the zoning map that we're adopting? Do I have a motion for that?

Brandon said I make a motion for him to start on the new zoning map now.

Mayor Beagley said Okay. Do I have a second?

LuAnn said Second, but we probably need to include and review the master plan and goals for Elwood before.

Mayor Beagley said Yes.

LuAnn said Oh, oh, that's two separate things.

Mayor Beagley said Yes.

LuAnn said Gotcha.

Mayor Beagley said Okay. All in favor?

Everyone there said, Aye.

Mayor Beagley said Any opposed?

Mayor Beagley said Motion passed.

Mayor Beagley said Okay. Your next subject.

Carson said You should have a paper in front of you with the vision and Snowville values. So we, as the planning board, just want to adopt Elwood's. So if you want to read through that.

Mayor Beagley asked Okay. How quickly are you wanting to accept this? I think we need to probably take time to read through this and stuff like that.

Carson said it doesn't matter.

Mayor Beagley said Okay, so they could take it home and read it.

LuAnn said Well, it's short. It's only. It's right here. It's just this. So we can read it.

Carson said It's not the whole master plan.

Mayor Beagley said Oh, it's not. This is just what we talked about.

LuAnn said Maintain the community's small-town character and rural lifestyle. Protect the environment, including its water resources, healthy riparian and other ecosystems to use and recreational opportunities; celebrate our community's agricultural heritage; provide transparent and communicative government governance; continue to provide quality and responsive public safety services,

and ensure adequate, well-maintained infrastructure. The master goal is to maintain the rural character of Snowville by only growing at the pace that available resources allow. This is accomplished by ensuring growth stays on target through vigorously pursuing the preservation of Snowville's rural agricultural look, feel, and quality of life. Second, being good stewards of Snowville's natural resources, and third, seeking to enhance community pride and values.

Mayor Beagley said Okay.

Okay. Do we have a motion? Gosh, I am. Do we have a motion to accept? What is this called? Elwood's plan, vision, and values. Okay. Do we have a motion? Do I have a motion from?

Brandon said I make a motion.

Mayor Beagley said Okay.

Brandon said For the vision and values plan.

Mayor Beagley said Okay. Do we have a second?

Trisha said Second.

Mayor Beagley said All in favor?

Everyone there said, Aye.

Mayor Beagley said Any opposed? Motion passed. Okay. All right.

Carson said I think, as far as the Master Plan, Eric, we're waiting on you. I think we're working with Eric, so our goal is still to have it done by the end of the year.

LuAnn asked, " Has it made it easier to have the Elwood one, kind of?

Carson said Well, yeah, then we found out Snowville has one from 2008, and we didn't know.

LuAnn said Oh, was it similar?

Carson said I haven't actually seen that. I didn't answer that question.

LuAnn said Okay.

Carson said But we're still going to need some money. Eric, are we going to build with that map? We're working on that. It's in the works. We don't have to have money. It's gonna have to go to the lawyer and Eric. Well, they are designing.

Carson said it is in the works.

LuAnn said Okay.

Carson said that's Eric going for those two books. Nice. You heard that.

Mayor Beagley said Okay. It looks like we have a quote for new garbage cans of \$3,060. No cents.

Brandon asked How many garbage cans was that?

Trisha said 36

Brandon said 36.

Mayor Beagley said I must have put that part someplace else. Okay. Oh, yeah.

Brandon said So I'm just waiting. I talked with Stacey. She's going to give me a count of how many people pay for garbage can service, and then once we do that, then we can move forward to getting the garbage cans and then assessing how many people. Right now, I've got a figure that about 60 people have garbage can service from us. So if we win 24 months, it'd be \$2.25 for two years, or three months, it'd be \$1.42.

Mayor Beagley said Okay.

LuAnn said And then after they're all paid for, it stops.

Brandon said, once it's replenished, then we can revisit if that service is still required for increased costs or whatever, or take it away at that time. So as soon as I get a count, we can talk about it in our

Stacey said work meeting.

Brandon said work meeting, and then vote on it next month.

Mayor Beagley said Okay. Do we need to vote on this too now? Okay. Do we have a motion to accept the quote for the new garbage cans of \$3,060? Do I have a motion from?

LuAnn said I make a motion to accept the quote from IDAWY Solid Waste District for 36 garbage cans at a price of \$3,060.

Mayor Beagley said Okay, do I have a second?

Trisha said You have to wait, Mike, until he says it.

Mike said Oh, I'm sorry.

Trisha said I already got in trouble.

Mike said Don't want to hurry this up, any.

Mayor Beagley said Okay. Do we? All in favor?

Everyone there said, Aye.

Mayor Beagley said Okay. Any opposed? Motion passed.

Mayor Beagley said, Okay. We got a letter from gosh that letter I got at home about the signs out on the freeway here that are on private land. We got permits we've been paying for, and they want to know if we want to keep the permits or not. Their signs has been blown over.

Trisha asked How much is it?

Mayor Beagley said that was \$60 or something like that.

Stacey said \$180.

Mayor Beagley said \$180.

Brandon asked A month or a year?

Mayor Beagley said a year. Now these signs are-they're not normal freeway signs. It's telling what's in the town and stuff like that, like the one we have down at this end.

Trisha said Yeah, this one down here fell down.

Mayor Beagley said There are two of them that fell down there.

LuAnn said Yeah.

Mayor Beagley asked Do we want to keep those kinds? Yeah.

Brandon said Should we look in? Well, we've got some added. Do we need to add stuff to it, or do we just want to?

Carson asked How much does it cost to get back?

Brandon said Yeah, if you let it go, how much does it cost to get it back?

Mayor Beagley said That I don't know.

Stacey said that is a good question.

Mayor Beagley said Yeah.

Tammie said What the process that could be very daunting.

Brandon said Especially if it's private ground.

Mike asked Who is the private ground? Who is it that owns it?

Mayor Beagley said I couldn't tell you myself.

Mike said I know where it's at, but it's on the access road.

Mayor Beagley said Yeah, there's one on that side of the freeway, and there's one on this side of the freeway.

LuAnn asked, and we have, and it's for both.

Mayor Beagley said both of them were on down.

LuAnn said Well, I think it's good advertising for the city.

Mike asked Where is the one on this side of the freeway?

Carson said It is in the ditch.

Mike said But that's not the county sign, is it?

Stacey said Is it a Snowville sign.

Carson said County property.

Mike said Snowville sign.

Trisha said I don't mind paying the fee, but I think that if we're going to pay the fee, we need to get the signs put back up.

Mayor Beagley said They've been down for quite a while.

Trisha said Yeah, that's my thought.

Brandon said Is it UDOT that has to come put them up, or do we order them through?

Mayor Beagley said Yeah, UDOT.

Mike said, " Before, we've had to do that privately. I had YesCo with a bid to put it up. In fact, they were going to put it up for nothing, as long as we let them put their name on it.

Mayor Beagley said Well, the permits are through UDOT.

Mike said Several years ago.

Mayor Beagley said Yeah.

LuAnn said Oh, they might still want to do that.

Mike said So I don't know what the situation is there now.

Mayor Beagley asked Okay, you want me to get more information?

Brandon said Yeah.

Mayor Beagley said And have it for next month. Okay, I'll get more information.

Brandon said I don't think we should get rid of them.

LuAnn said No, we need them.

Brandon said I think we've got to get them updated.

Stacey asked My question is: Do you guys want to pay it, because it really does need to be paid?

Mayor Beagley said Yes.

Brandon said yes.

Stacey said Okay, I'll pay it.

Mayor Beagley said Okay. Do we have a motion to pay the permits for the billboards on the side of the freeway? Do I have a motion from?

LuAnn said I'll make the motion to keep the billboards on both sides of the freeway for \$160 a year.

Mayor Beagley said Okay. Do I have a second?

Brandon said Second it.

Mayor Beagley said All in favor?

Everyone that was there said, Aye.

Mayor Beagley said Any opposed? Motion passed.

Mayor Beagley said Okay, the next one. What I would like to do on this one, and it's about the end of Tuesday: the new program that the county is trying to push on us. I think we spent a lot of time talking about this. We're going to be here late, so if we could set up a workshop meeting here in the next week or two or something. LuAnn asked if this is about the county taking over our EMTs.

Mayor Beagley said yes.

LuAnn said I'm 100% against that.

Mayor Beagley said I know, but we should discuss it anyway.

Brandon said Let's have a work meeting and invite, you know, Dave and Jed.

Mayor Beagley said Yeah, Dave and Mike already talked to them about it.

Dave asked can I could add something real quick.

Mayor Beagley said Uh-huh.

Dave said I did have a conversation with Corey Oakes yesterday.

Mayor Beagley said Okay.

Dave said you know, and I and it was for some other things, but I brought this up. He also said he would be happy to come out to a meeting, you know, and answer questions and talk about it too. So that would be

Mayor Beagley said that would be great. Yeah.

LuAnn asked How do you guys think about it? What are you thinking?

Dave said, you know, Corey told me, you know, he didn't want it to come across like the county's pushing it and wanting to take over. Corey says, you guys can keep doing things the way you're doing it, and that would be fine. You know, there are questions that I have with that, and you know, maybe down the road we maybe there are some changes that have to happen. But I don't think it's something we need to feel like you have to make this decision yes or no right now. No. As Corey said, you guys can keep doing it the way you are, and down the road, if you say no, we like how this is working, and we just keep doing it that way. Or if you want to do stuff with the county, Corey makes it sound like that's totally open.

Mayor Beagley said That's not how the County meeting sounded.

Dave said we don't have to say yes or no right now.

Mayor Beagley said No, and it's supposed to be implemented in December.

That's where we want to start.

Dave said Yeah, but we could, and we could go past that.

LuAnn said Wouldn't that be bad going to go with the county rather than just have what the EMTs are doing right now?

Mayor Beagley said Well, that's why we should have a workshop.

Dave said Yeah, there's a lot to discuss there because there's, you know, there's definitely some questions that we have, and Snowville Town has put a lot of effort into having the ambulance and the setup that they have, and they've done a great job of managing it. You know, you don't want to just give that up or throw it away.

LuAnn said that's right.

Dave said, and you know, I made that clear with Corey.

LuAnn asked What a plus would be?

Dave said, I mean.

Mayor Beagley said Can we discuss that in that work meeting.

Brandon said Can we have a work meeting because there are all sorts of questions?

Dave said Yeah, I mean, it's probably better, you know, if you don't want to take a lot of time right now. There could be some pluses that I could see. You know, there can definitely be some negatives. I don't

Trisha said it is a terrible idea.

Dave said I don't feel like.

LuAnn said I think it's a terrible idea myself.

Dave said Well, yes, sometimes Corey says the size helps, and it does with certain things. But also, size can also lose you in the whole mix of things, and you can feel ignored because you know you're out in the far end.

LuAnn said, and have we ever not been ignored?

Dave said, well, I mean that's that's part of the reason why Snowville got an ambulance back when they did, is, you know, looking out for the citizens and doing you know being proactive to get that to happen.

LuAnn said I don't want to be under that control.

Dave said So yeah, it's a little odd for the county to be like, ' Oh yeah, we want it now.

Mayor Beagley said I know you want to ask questions.

Brandon said Let's set up a work meeting.

Mayor Beagley said Yeah, I got stuff from the County Commissioners and stuff like that, and so, and I know you want answers right now, but if we sit here and talk about it, we're probably going to go until 9 o'clock tonight. Do you want to do that?

Mike said no.

Trisha said no.

Mike said Let's go ahead and have the work meeting and discuss it.

Mayor Beagley said Yeah, and we go in more depth and stuff like that.

Brandon asked Should we hurry and look at a date and see what we can hurry and get together, so we don't leave here wondering? Do we want to try to get it in August, or do you want to go like the second weekend in September?

Dave said Will you don't want to do it with County Fair Week in August.

Stacey said you've got next week.

Dave said Yeah. So if you wanted to get it in next week, we could do that.

Mayor Beagley said I won't be able to be here. Well, I don't know for sure. I got jury duty from the 26th to the first.

Brandon said What about the first weekend?

Mayor Beagley said, " Yes, the first week of August.

Brandon said What about the first weekend of September? I know it's Memorial Day or Labor Day.

Mike said Labor Day.

Brandon said Yeah, that's like we did it either Tuesday, Wednesday, Thursday, maybe.

Mike said What about Wednesday.

Brandon said The second?

Mike said September the third.

LuAnn said September the second.

Brandon said September the second.

Mike said the second and third.

Brandon asked Who were you going to have talk to us?

Dave said Well, Corey had offered for him and Kevin to come.

Brandon asked Dave Do you want to check with them.

Dave said And see if, yeah, I can follow up with them, and if you guys would like to have them come and you can ask questions directly to them, he said he'd be more than happy to come.

Bandon asked What do you guys think?

LuAnn said You need to be here too, since you're over the EMTs.

Dave said Yeah, I'll plan on being here.

Mike said Can you throw out the second to third and see which one they can make?

Dave said Okay.

Trisha said I have to work the third. What about next Wednesday, the 19th?

Brandon said I'm available.

LuAnn said that might be too soon for them, but

Mayor Beagley asked Okay. How many days do you have to post a work meeting?

Stacey said 24 hours.

Brandon said Yeah.

Trisha said I think it's 24.

Brandon said If we had it posted by Monday, that would be fine.

Trisha said Okay. If you want to do it on the third, I would. I can get here when I can get here, but I can't be here.

LuAnn said Well, the second. Are you off on the second? Yeah, I'm off on the second.

Dave said, So we want to just put it as the second or the 19th, and see.

Trisha said Yeah, and then let us know. Text the mayor or somebody.

Brandon asked Is that okay with everybody else?

LuAnn said, Yeah.

Brandon said, And you want to do it at 6: 30?

LuAnn said, No, we can do it earlier.

Brandon said, Whatever works for him, five on

Dave said Any time after five.

Brandon asked Jed, would that work for you?

Jed said I can make it work.

Brandon said Oh, okay.

Mike asked What if we decide on 5:30?

LuAnn said Five between five. Let's do it earlier rather than later.

Dave said Okay, we'll try for five.

LuAnn said If they can be here by five, then whatever time they do come.

Dave said Okay.

Mayor Beagley said Okay. The next one we got is an ordinance with fees. I know we discussed that in our other meeting.

Brandon said Yeah so what I sent an email out to everybody in the town. It says in there just what I was researching. Now, if we want to check with the lawyer, that's fine. But as on the titles in the ordinances, whatever's under that title, we can assess a fee to that title, and it'll cover everything under that order.

Mayor Beagley said as long as it doesn't fall underneath the misdemeanor charge. If it falls underneath the misdemeanor charge, they will get different fees.

Brandon said Well, yeah. Well, we can assess, so yeah. But I'm just saying.

LuAnn said Yeah, because then it all goes together under the same.

Brandon said Correct. So we don't have to go. That's the way I read it.

LuAnn said That's how I read it, so we will not have to go through every single ordinance.

Brandon said Yeah, we can assess a fee and cover everything. That way, if we write up a fine or whatever, we know this is the fee that's assessed.

Mayor Beagley said the County has set misdemeanors for A, B, C, D.

Brandon said Okay. So how do we want to proceed with that?

Mayor Beagley said And I can find out what they are.

Brandon said, and then we can just start in our work meetings, start going through the titles, and look at. And I don't know how we determine what's a misdemeanor, what's not.

Mayor Beagley said there's a way; I'll find out.

Brandon said But then we can start getting those fees assessed.

Mayor Beagley said You won't believe how many trips I made to Box Elder County in the last two weeks.

Brandon said That's good. You're helping us learn.

Mayor Beagley said I'm learning.

Brandon said So we'll be right along with you. Okay, so we can talk about it more.

Mayor Beagley asked Okay. Did anybody get a copy of this letter for the Tanners?

Brandon said The way we understand this is the reason why they had to put this in, because that one law or ordinance is written up.

Mayor Beagley said Yep.

Brandon said they have to do it this way to get it.

Mayor Beagley said Yeah. In 1999, they passed the laws, the land, you know, laws, and what they've done was all the land when they're registered after 1993 has to be registered as subdivisions, and if the land isn't registered as subdivision, and someone wants to get a permit for it, and they're living next to a town, they have to get a letter from that town denial for them to be annexed in, and they could get a permit. But if it's registered as a subdivision, they don't have to have a letter. Like the Joneses, people ask questions, but why? How did they get a permit? That land I checked, and it's registered by the county as subdivision land, so that's how they got the permit to put that house there. I know it's kind of funky.

Tammie asked But did they rezone it for the house there?

Mayor Beagley said Pardon?

Tammie said Did they? Was it already zoned for the county?.

Mayor Beagley said this was in the county. The Tanners have land adjacent to the town, and because their land is not registered as subdivision land where they want to build a house, they need to get a letter from the closest town that they can't be annexed into, and then the county will give them a permit to build a house. Kind of dumb.

LuAnn asked about the Tanners- they're the ones that have the new house out here.

Brandon said they live on the ranch on the hill.

Mayor Beagley said Yeah, and they're building a house right over here behind Colleen's on Box Elder County.

Trisha said Oh, it is Carolyn's daughter, Tom and Kristen.

LuAnn said Oh, Tom and Kristen are going to build a house over there.

Trisha said Yeah.

LuAnn said Oh, gotcha.

Brandon said They live in that house on that ridge? Trisha said Yeah.

Trisha asked, so we're going to deny the request so that they can get it started.

Mayor Beagley said That's what this letter for is deny them to be annexed in.

LuAnn asked Are they going to be pissy?

Mayor Beagley said No, they're happy with it. I talked to them.

Trisha said That's what they have to do to get their building permit from the county.

Mayor Beagley said Yeah. Now this doesn't stop them in the future. If they want to be annexed in the future, just go through the normal process, and we can annex them in. Yes.

Tammie asked so the town does not want to annex them.

Brandon said, per this law.

Mayor Beagley said, for this law, for them to build their house.

Brandon said Building permit.

Mayor Beagley said Yeah.

Tammie asked But you don't want them. You, as a council, do not want them on the council.

Brandon said We do.

Mayor Beagley said Yeah, we do.

LuAnn said But they have to do it this way first.

Mayor Beagley said Yeah, before they can get the permit. I know.

LuAnn said But then we will annex them in.

Mayor Beagley said If they want to. Yeah, we can annex them in.

LuAnn asked Well, are they going to want water?

Mayor Beagley said No, no water or garbage from us right now. Yeah,

Brandon said Eventually.

Mayor Beagley said It's just a process; our stipulation passed those laws in 1993.

LuAnn asked, and this is the town's laws or the county's laws.

Mayor Beagley said The county.

LuAnn said What a dumb thing.

Mayor Beagley said Okay, now do we want a motion to accept that letter, or just give them a letter?

Brandon said You have to accept the letter.

Mayor Beagley said Okay, okay. Do we have a motion to annex a denial letter to annex the Tanner into Snowville Town? Do I have a motion from?

Brandon said I make a motion to accept the denial of the annexation request.

Mayor Beagley said Okay. Do we have a second?

Trisha said, Second.

Mayor Beagley said All in favor?

Everyone there said, Aye.

Mayor Beagley said Any opposed? Motion passed.

Mayor Beagley said Okay. We'll make sure they get the letter then, so they'll be happy, and they can build their house.

LuAnn asked Did we skip the ordinance, or did I miss something?

Mayor Beagley said Pardon?

Brandon said We talked. You were talking. We're going to get more information.

LuAnn said Oh yeah, that's right. Okay, I'm old. I'm old. Come on.

Mayor Beagley said No, I could use that if you can't. Okay, the next thing is Box Elder Sheriff. He's not here. Did we get any information from the sheriff at all?

Stacey said no.

Mayor Beagley said Okay. I guess. The engineer, Eric, you're up. So, two items on truck stop hookup. Stacey, the water that you made was that for three years, or was that just per year on the water use?

Tammie said it was me. That's the average for the year.

Eric said Each year.

Tammie said Each year, I have the exact usage.

Eric said That's okay. I just did the math on that fast, and if we add them on as a hookup, it'll be a 10% increase, which is not terrible. But I'd like to get more data from them to see what they have.

Tammie said I figured it was about six or 7000.

Eric said Yeah, 7000 per day.

LuAnn asked for Flying J.

Eric said We run about 70,000 gallons.

Stacey said But you got to keep in mind they're going to rebuild too. Flying J is rebuilding. They're doing five showers.

Mayor Beagley said That's true.

Eric said Yeah. So if I could get more data, I can just kind of table it and not get more data kind of scene and analyze more from that guy?

Brandon asked Has he reached out?

Stacey said Oh yeah, he's bugged me every day.

Brandon said Oh okay. I just wonder.

Stacey said he had my cell phone number, and I had to tell him to quit calling.

Brandon asked Okay. Did he give it? Did he give us more data than what he claimed? Okay.

Eric said It'd be nice to get more.

Stacey said Are you sure? I didn't want to give it to him.

Brandon said Yeah, let Eric deal with him.

Stacey said Okay.

Brandon said Bring down the numbers.

Eric said I just need more data.

Stacey said Okay. Can do that.

Eric said That'll be helpful. And then on the sewer protection plan, council for the old well out here. It was due back in 2007. Did you share that by chance?

Stacey said Yeah, I have the letter, but I didn't print it out.

But I did see the letter.

Eric said Okay, so back in 2007, a source water protection plan was due on the old well. So we did the preliminary design, which we worked on and kind of initiated the whole process, got the things built. But typically, when you have a source all finished up, and it's done and constructed, you notice, Mike, too? That you then follow through with the drinking water transportation plan that protects that source water into that well. That never got completed because we found it had sulfide, manganese, and iron. It was just a nasty well. So, since that time, we're trying to figure out how to clean it up, and it's not cheap. It's a couple million bucks to clean the well up. So what do we do with it? And that's and that leads kind of into discussions. That's why it was never done, right? Let's mop all this and not take care of it. So that leads into discussion with USDA. And your question starts on the search grant, right? So we did a search grant back in 2018 to identify what to do with this well. Happy well, we ran all the numbers on that, and it was going to increase your water rates up to \$125 bucks a month. This is a little extra.

LuAnn said Jeez.

Eric said and that and that kind of got mothballed. So right now everything's kind of a hold pattern until we decide what to do. So I explained that to Carl. Our son says, "Carl, we can't afford to have this kind of a fee in the town, right? So he said, "Call back. Let me discuss how we approach it. So until we get that worked out with the search grant, they won't entertain a new one. We can't use a search grant to pay for tax debt outside of the property. So, as far as getting funds to do the general plan, we'll have to chase down CIB funds. CIB community impact board funds are in your place, so I think in good shape to do that. And you've already applied for inventory in town. That's already in place with CIB. I did that a couple of years ago, so that's in place. So we just have to apply for funding for it, and they'll give me \$50,000 towards plans. We can do the general planning. We can do the things that we do. So, that's kind of my approach. Apply for five through CIP and get that in process. Since we're already halfway there, let's see. Did I miss anything in there? Oh, what do you want? Do you want to do this source contributor picture plan for the well, or do you want to hang on till we find out? What do you want to do? What can we use it for, as it says irrigation, filling the pond next to it?

Mayor Beagley said Okay. Now, does that water really smell like I've heard it?

LuAnn said Oh Lord!

Mayor Beagley said So, do we want to put it on the ground? Would it smell real bad enough that?

LuAnn said No, it will stink the whole town up.

Eric said It dissipates, right? It just so fights in there. It's the iron that caused the issue with the water heaters, dishes, dishwashers, washing machines. You wouldn't like that. That means you can't change the colors for that. So, but if we get it clean that way, I know since then there's got to be some newer type of technology, newer chain stuff. I've had phone calls. Remember, Kyle Somerset is still like.

Brandon asked if there is any funding that will help us clean it up?

Eric said there is. If we use the approach, it's I want to say it comes through the legislative process. Can't really work on terminal, but it's directly slated for an improvement project. We have to have our state legislature, who represents this town, go through and actually apply for it. That's competitive, but it does. It's direct spend direct spending.

LuAnn asked Would it kill your lawns? Could it be used as a secondary?

Eric said Oh, yeah, it's great for irrigation. Yeah.

LuAnn asked Could it be used as a secondary well for watering your lawns and your gardens.

Tammie said You would have to lay a new pipe.

LuAnn said Yeah.

Mayor Beagley said Oh yeah, that'll be expensive.

Eric said, and that was two and a half million, though. And what

Brandon asked what needs to happen to be able to set it up for fire hydrant use for the fire department and stuff like that, fill the trucks. I'm just asking. Is that an option?

Jed said Very much so.

Brandon said I mean, does it have to be cleaned up to do that, or do we put something together to use it for that?

Eric said We did need a valve on the line and just have it turned on and want to fill. So it is. That would smell great, but it turned on right.

Jed said that would be a really viable option for fire department use for us, for the county, for many others.

Eric said construction is a great solution.

Bandon said Yeah, if people start building out here, they have a place. We tell them we put a meter on it. That's where they fill up their water truck and set off on fire hydrants, and that's what they do for projects.

Eric said the caveat here is still a drinking water source well under the State code, so we'd have to get that plan in place, protected. So that still has to be done.

Tammie asked We're leaning towards doing another well, right?

Eric said yes. In fact, there's been some discussion on this well here. Yeah, I haven't heard from Mike like that first major.

Mike said I don't think he's going to make it. Okay. Didn't think he would.

Eric said There has been some discussion on this web lot to the east of us here about using the insult. That's still kind of the process.

LuAnn said Yeah, I think that's a great idea if we can use it for something besides, because nobody wants that in their house.

Eric said But if we get the text from Time In Place. He said that puts that to bid, essentially.

Brandon asked, so we got to wait for that before we.

Eric said Yeah, and it's a \$11,000 bill, and that was back in 2023. I got the approval for that. Same firm that did the initial study on it, so they know they have the data. If you folks want to entertain that, get that done. I guess it's how

LuAnn asked How much is it?

Eric said \$11,000?

Tammie said I don't. That's a lot of money to use the water.

Eric said Yeah. Carson has funds in his water.

Carson said Yeah.

Tammie said He gave a thumbs up. He did. For the record, he didn't care. Yeah.

LuAnn said, and there's no grant. We just have to pay that. The city has to pay that. Yeah, I didn't think about that.

Trisha said I think we need to discuss.

LuAnn said We need to think about that. We can't do that right after.

Eric said No, no, it has been done.

Mayor Beagley said There's a lot to think about on that one. It's been 20 years, almost 30 years.

Brandon said we need to figure out some way to pay for it.

Eric said, and I may ask.

Tim Heyder said the smell of that well was horrible.

LuAnn said it smelt all the way to my house.

Tim Heyder said We had to pull the pipe away because it smelled so bad. I mean, it was the worst smell. It was really bad.

Mayor Beagley said We'd always know where the fire trucks were.

Eric said So I table that discussion anyway. I can call down here to the state. You can use that as an irrigation well and just pick it off the state side. Then you've got to have another well for standby. So we're it's kind of in process. I need to call Carl Larson at USDA. What's your looking at, right? We don't want to cause the town to have a huge burden on fees, but I don't want to do that either.

Mayor Beagley said Yeah.

Eric said Okay. Anyway, that's kind of what I see. Anything else on there, Tammy Stacey? I think I've got a lot. Any questions for me on that outside of those few things? Give me a call. I'll take the first down here. And I'll try to call you about that. I don't think, yeah. And then, oh, as far as that, the Willow Creek, the Willow Stick study, I haven't heard back from those guys yet. I assume they've been there. Have you seen them in town? Do they come to Libel Stick? Got a backpack guy or walking the properties?

LuAnn said Oh yeah, they have these cameras here.

Mayor Beagley said Oh, is that contract?

LuAnn asked, Yeah, are they the ones?

Brandon said That was the that was the pot holding crew with the back truck going around checking lead pipes.

Tammie said Yes. Okay. Sorry.

Eric said The guy with the backpack and the box unit. Yeah.

Brandon said Yeah. I've seen. He came to the post office on the sidewalk. I've seen.

Eric said So he's been here. Sweet. Okay. I haven't heard back from those guys yet. So lead pipes. They're finding lead pipes out here. Is that? I don't think they know.

Mayor Beagley said Yeah.

LuAnn said Yeah, they went down and they came into our house, my mom's house, and they're all copper and plastic.

Mayor Beagley said When I talked to them, they were halfway through, and they said, 'What they saw so far, everything was looking good.

Eric said Good, that's good to hear.

LuAnn said, So, what would they be pumping? So they were at the little campground next door to us. They were doing something with a truck.

Brandon said They're just potholing them down, so they don't have to shovel. They just wound it with water and sucking up.

LuAnn said Oh they were over there for a long time. So I wondered if they found something over there, but yeah. So I just wondered because they were over there for a really long time.

Eric said Yeah, probably trying to do. I think rather than try and identify it through means like mechanical means or electrical means, I just talk with them and get a visual on it, so.

LuAnn said Okay.

Eric said Any questions for me, anybody else? Sweet.

Mayor Beagley said Thank you.

Eric said Good.

LuAnn said Thank you.

Trisha said Thank you, Eric.

Mayor Beagley said Okay, Snowville Fire Department.

Jed said The only thing I have is on the last meeting I talked about adopting fire ordinances from the state and the county when they push them down into the

town limits. Just following up there. I don't know if we need a resolution, if we need to make anything official, if we want to do it on a case-by-case basis, then we.

Brandon said I thought we already decided.

Trisha said I thought we decided to go with the State; whatever the State, whatever they recommended, we would go along with.

Jed said So, do we need to put something in writing?

Mayor Beagley said I would say so, just to make it legal.

Jed said If we do have an issue or a problem, that'd be the first thing that people go back on and see if it was ever officially done.

LuAnn said For like, for like what, like for instance,

Jed said just the verbiage would pretty much say that when the state or county passes fire restrictions, the Snowville Town automatically adopts them into the restriction ordinance as well.

Mayor Beagley said Okay. Yeah, we could write a resolution up to that.

Tammie asked so does that means, like, the firework thing, where the state says that then Snowville can override it.

Jed said, like, how it sits right now is when the State or County passes out or pushes down fire restrictions. Like we're in stage two right now, which means no open burning, spark arresters on lawnmowers, no cutting or welding in dry grass, that sort of stuff. That passes for all unincorporated Counties.

Mayor Beagley said Yeah,

Jed said, so inside municipalities, it's up to their own prerogative to pass their own ordinances regarding those restrictions. So, like right now, if somebody said they wanted to have a big open bonfire in their backyard right now, as long as it's 50 feet from their structure, there's nothing we can do about it because we don't have restrictions in the Town of Snowville.

Mayor Beagley said Well, okay.

LuAnn asked so can we just do it through a vote and a just.

Brandon said You have to write the resolution.

LuAnn said Okay.

Brandon said, so basically, a state fire restriction that is adopted by Snowville Town.

Jed said, so whenever the State or County pushes them out, it automatically rolls over into our municipality. I'm sure a lot of, like Tremonton, Brigham City, they'd all have something in writing as well. I could jump off of if we need to.

LuAnn asked Do most of our municipalities go along with that?

Jed said Yeah. Yep. Here, like we've done it previously, is I come before the council and say we're in stage two restrictions passed down from the State. Is that something that we want to look at in the town? We get the thumbs up. We're good to go. But I think it'd probably be in the best interest of the town to have something official and in writing and a little bit enforceable.

Mayor Beagley said Yeah, because if someone in town starts a fire, they can't get back on the town.

Jed said that is how it would work too is if the fire originated inside town limits and then spread into an incorporated county, the town was the one who foots the bill for that fire suppression.

Mayor Beagley said Okay. Yeah, we definitely need some.

LuAnn said If we didn't go along that, what's that? If we didn't go along. Make the resolution.

Jed said Even if, but so say, like right now, we're just going to use me, for example. If I want to start a big bonfire on a piece of property that I have in Snowville Town limits and it gets away from me and it burns 80,000 acres up in the County, the Town is the one who foots the bill for the suppression of that fire, then the Town would then try to recoup money from me because I am the one that started the fire. If there are restrictions, the Town then has more teeth to go after those people for that restitution.

Brandon asked should that be added in the Town's resolution.

Jed said What's that?

Brandon said The person who created the fire, whatever it will be.

Jed said That's just that's just kind of passed down from stage two. So once stage two's adopted, that's automatic.

Brandon said It's already okay.

Jed said, but without restrictions right now, there would be nothing that says the town could go back on me for an institution for a large fire that I started because you have no restrictions in this Town.

Mayor Beagley asked, and you said other towns have something written up to protect them.

Jed said Yeah.

Mayor Beagley said I could check.

Jed said a lot of other ones just pull it in and adopt it as soon as they're rolled out from the State.

Mayor Beagley said I'll look at some other towns and see how they've written that up. It'll give us some idea.

Jed said Any questions for me?

Mike said I don't think it'd take much. Just need a resolution saying we adopt the State and County fire restrictions.

Jed said Yep, whenever they're passed out, whatever the state's in, the town isn't as well.

LuAnn said Okay, we'll get that done soon.

Jed said Good. Any questions for me, fire department-wise?

Mayor Beagley said No.

Trisha said Thank you all.

Jed said Thank you.

Mayor Beagley said Snowville EMS.

Dave said Okay, so we have the opportunity with Cami and MacKenzie to take a class that would put them at the advanced level. That's something that we do need in our service because we run as an advanced ambulance, so we always have to have at least one advanced on the ambulance. It is how it works. The class for the two of them is the total together: \$3,909.98.

Trisha said Do you have the funds?

Dave said I believe we do.

Stacey said Well, we just went here for capital grants. That's some of it.

Dave said Yeah, yeah, we've got it done.

LuAnn said I was going to say, does the City have to pay for that, or does it? Do the EMTs help pay for that, or

Camie Pugsley said we pay for our State licensing, or National licensing is just the tuition for the class.

Dave said Yeah, in the past we've paid the tuition to get EMTs certified and to also go to the advanced level. You know, we had Ilesha recently. That was probably the most recent one that we got from the basic level to intermediate.

Trisha said I find that as long as we have the funds.

Dave said Yeah, I mean, ultimately it's something we need because we need to have the intermediate or advanced.

Tammie asked Are there any others?

Dave said, possibly, but I think at this point too, it would be if we get these two into advanced, we'd probably be better off with our budget to try to get a few more to the basic level, and you know, because that would help us overall.

Brandon said that would help to spread it out so you have enough people.

Dave said yeah.

Brandon said Yeah I'm good with it if it's covered.

Mayor Beagley said Well, I could see the town benefiting from something like that.

Camie Pugsley said It's a self-paced class. We have nine months to finish. We have a plan to actually have it done. It would start on the 31st of August, and we want to be done by the end of December, so we can be taking our nationals in January and be able to get this through as proposals.

LuAnn said advance details, what

Camie Pugsley said we can push better medications. We can give IVs and inducements that way.

Mike said we can be pushing drugs.

Camie Pugsley said Yeah. Right now we have Mike, Jeb, Nate Tolbert, Janette, and Ilesha. I'm not working at the Mine anymore, so I'm here and more readily available. And so I feel like it's an asset because sometimes we have to wait around until we meet up with somebody, or the other day we had about a few weeks ago. We had to stop and have someone from Tremonton get on the ambulance with us. So just a quick example that they still needed at this point.

LuAnn said So that'll put five of you as advanced.

Dave said Yeah. Well, and it would help us also in our Efforts to have the second ambulance available because the same thing, you know, we want to have an intermediate on that ambulance. So if you're going out with both of them, you know, we you got to have a minimum of six people. There are three on each ambulance, but you've got to have two intermediates to make that work.

Trudy said Which way did just what within the week we were involved ambulances?

Dave said Yeah, yeah. So I mean, it would be good for us.

LuAnn asked if we have the funds to do that.

Brandon said Set it up. Jim. Let's make a motion.

Mayor Beagley said Okay. Do we have a motion to send Camie? Is that how you pronounce it? Okay, Pugsley and Mackenzie Harris to the EMT Advanced Training Course for \$3,909. Okay, do we have a motion from?

LuAnn said I'll make a motion to approve sending Camie Pugsley and Mackenzie Harris to the Advanced. For \$3,909.98

Mayor Beagley said Okay. Do we have a second?

Trisha said Second.

Mayor Beagley said Any opposed? All in favor?

Everyone there said, Aye.

Mayor Beagley said Motion passed.

LuAnn said Thank you for wanting to do that.

Mike asked Who is that through?

Dave said this is through the number 4 task or course. It's a private company.

There was another class that will be available in January, but it's about \$500 more per student, and they would just take that much longer to get. Mike asked Isn't the one through lighting that we used before, is it?

Camie Pugsley said no longer doing it. No,

Jed said Not one that I took.

Camie Pugsley said Yeah.

Jed said Different group.

Camie Pugsley said Yeah. You can. We could go through Bridgeland, but we would have to commute to Logan five days a week, and we just can't afford or walk for that many miles on our vehicles. So this is a hybrid class. We have to go to Roy once a week, and then we have to go into Tremonton or have some people in Snowville meet us and kind of participate in our hands-on and skill streaming a couple of times a week as well.

LuAnn said We rode a bus to Park Valley.

Camie Pugsley said Yeah, definitely. It's better than driving to Logan.

LuAnn said And we trained in a school.

Camie Pugsley said Yeah, I love it. I wish we had more of a hands-on that was more local. But the hybrid class just like is no longer going on, yeah. So this gives us a hybrid class that we can start. As I said, our first class would be on the 31st.

LuAnn said Very good.

Trudy said We could be looking at a basic class being going on.

LuAnn asked You got we have you got some more people that are interested.

Dave said Yeah, good. We've got some others that we can get into the basic class.

LuAnn said Very good.

Mayor Beagley said Okay thank you.

Mayor Beagley said Snowville Clerk.

Tammie said Oh, is that me? So I talked to Brandon; he was wondering about the late fees on the water bills. Currently, it's 5%. So if you see on your water bill, the \$37, the usage is like \$1.80 or something, and you pay late. So he wanted to raise that. So I got some comparisons. Garland City-they charge a five-dollar flat

fee for anything late. They don't do a percentage. Tremonton is a 15-dollar flat fee. Corinne is 10-dollar flat fee.

Brandon said Howells is \$12.

Tammie said Yeah, you can do them online. So if you want to go to, like, just a flat rate instead of a percentage, is that, you know? I mean, that's something that some of the cities and towns are doing.

Brandon said I'm just suggesting because Stacey puts in the time and effort to then put that stuff together and send out. We should at least be covering her time doing that, and \$1.67.

LuAnn said Do we have a lot of late fees? A lot of late people there.

Stacey said I didn't have it this month, but last month I had a lot, and I had the crazy guys come to my house, and that would not happen again.

LuAnn said No.

Brandon said We put that note in the water bill. That would be hopefully they've seen it.

Stacey said I don't think so.

Tammie said this one has 30.

LuAnn said late.

Mayor Beagley said That's just about half the town.

Tammie said they didn't pay by the end of the month.

Stacey said Yeah. I actually have five. That I worry about every month.

Trisha said Plus, I have a \$15 late fee.

Carson said \$15 is like, you know, I got 100.

Tammie said I mean, \$15 is a big jump from the dollar.

Brandon said Yeah.

LuAnn said Yeah, but \$15 is still quite a bit for a lot of people. \$15 late fee.

Tammie said Yeah. So anyway, that was my research. I told you I would do it.

Brandon said Thank you.

LuAnn said Thank you.

Brandon said I agree with the \$15 one. Just do one set charge for Stacey and make it simple. Don't have to figure out a percentage.

Stacey said I called her and asked her how to do it. She said what we have to do. You guys have to vote on it, and then I have to email them, and then they will call me, and then they'll help me put it on the water bill, so it will be on for next month. So you guys can vote on that because I did put it on the agenda.

Brandon asked Do you want to go 15?

LuAnn asked do you want to go 15 or 20.

Trisha said I think 15 is good.

LuAnn said I think 15 is good.

Tammie said Yeah, I think that's the highest anybody charges around here.

LuAnn said Okay.

Brandon said We are special out here, so.

Mayor Beagley said Okay, do we have a motion to raise the late fee up to \$15?

Do I have a motion from?

Brandon said I make a motion to raise the late fee to \$15.

Mayor Beagley said On the water bill.

Brandon said On the water bill.

Mayor Beagley said Yeah, I'm sorry. Okay. Do we have a second?

LuAnn said Second.

Mayor Beagley said Okay. All in favor?

Everyone there said, Aye.

Mayor Beagley said Any opposed?

LuAnn asked, so the water and the garbage are together. Is there a difference in pay? No.

Tammie said Well, the water goes to the water account.

LuAnn said Yeah, the garbage bill. Okay.

Tammie said So the late fee would go just directly to the admin budget. Is what would happen.

LuAnn said Okay. Garbage goes to the garbage bill.

Tammie said Water goes to the water accounts.

Mayor Beagley said AJ Morgan. He's not here.

Brandon said He's right there.

Mayor Beagley said Oh, stand up.

AJ said I was just going to tell you the telemeter system hasn't been working, and for those of you who don't know what that is, that's just the communication from the tanks to the well to turn it on and off. It hasn't been working for about a month. They came and worked on it. I'm unsure if it's actually working. I just stopped to look at it again. It's reading at tank level, but the network's down on my phone, so I can't actually tell on my phone what it's doing. So I actually have got to run up to the tanks and see if it's really what the thing says is what's actually in the tank, or if it's lying to us. So just to give you a heads up, there'll be some expense coming down the pipe from working on that. But I'm working on it.

LuAnn asked Do you have a thing that reads from the outside, or do you have to dip it?

AJ said No, I can just look at the tanks and tell you if it's lying or not. I just go in there inside. I just go swimming.

LuAnn said Well, we had the different one for gas tanks.

Tammie said that was before we got our meters.

AJ said that's all I have.

LuAnn said Thanks, AJ.

Mayor Beagley said Okay, Councilmember Garbanati. I just wanted to get everybody's thoughts on getting a mini-split or something put in here. I looked at Lowe's and Home Depot. They range from \$500 to \$3,000. So it depends on what. I think we just need, like, a Zone 1 type thing. It's a DIY. We just need to get it wherever you want to put it. We just need to get power. I looked on the back there, and the meters are back here. So if we just come across and just put a box here, and then install the unit, or however we want to do it.

Tammie said I was going to say I was at the diner. Surprise, surprise! But I was talking to Zjani, and they're doing mini-splits over there, and she got three bids from different people.

Tammie said Then we can find out whether it's cheaper if we decide to buy the unit or if they get the unit for us. You guys interested in that or?

Trisha said Yeah, I want that.

LuAnn said I think so for sure.

Tammie said I think it's time.

LuAnn said It's past time.

Mayor Beagley said Those are both heating and air conditioning.

Brandon said the website was just looking at was just the air conditioning.

Because we had that right there, so I didn't know if we needed it.

Trisha Well, that puts off fumes.

LuAnn said No, this is a new one, and isn't this our heater?

Mayor Beagley said Yeah.

Brandon said Yeah.

LuAnn said So probably just the AC.

Brandon said But the double units are more expensive. So if we just did AC and could get it maybe put in on this wall, you don't have to run electricity very far.

Mayor Beagley said Okay.

Brandon said she said she'd get you the quotes when they come in.

Tammie said yes I will talk to her.

Brandon said Okay. Let's look at that.

Tammie said after the meeting we can talk to her.

Brandon said Okay.

Brandon said Yeah, the meters are right on the back, so it'll just be running an AC box or whatever. So that was my thoughts anyway. And if everybody's okay, we'll look at the quotes and kind of go from there.

Mayor Beagley said Yeah, let's get some quotes.

Brandon said Okay, and then the other one, I just want an update on the park electrical.

Carson said It's going to happen before the snow flies.

Mayor Beagley said I talked to Carson here about two weeks ago.

Carson said Brodie is swamped right now. He said he would come and do it if he absolutely had to. I don't think there's any reason to drop everything he's doing or have him come do it.

Brandon asked, can we at least push to get it done before October.

Mayor Beagley said Oh yeah, that's what I mentioned before winter.

Carson said yes before the snow flies. Yeah.

Brandon said It's just that we voted on it. We've been waiting on it. We just want to get it done and checked off our list to be done. Yeah,

Carson said it's not going to be as big of a deal as we thought. He's already talked about the amount of power, and he doesn't have to go from the hole. It actually might be cheaper in the money.

LuAnn said Okay. Good.

Brandon said Well, if there's some money left in it, let's have him over and run a little shoot over.

Carson said he'd probably do that because he likes me.

Brandon said cuz we've been so patient about that.

Mayor Beagley said Okay, Carson, thank you.

Mayor Beagley said Councilmember Johnson.

LuAnn said Just two things, AJ. I wanted to ask you if Matt from Coldwater talked to you because he was pretty nasty to me on the phone, and I told him I said I didn't know how to answer his question. I just said what he broke was something that we use for our water system. I can't tell you the exact thing, but I said there was water spewing out of it like a geyser. I said I know it's in use, and he said no,

it was an abandoned line, and he was really nasty, and I said, well, I gave him your number.

Mayor Beagley and I went and talked to AJ, and he called him.

AJ said so over that. Jim came and talked to me. I called him. He didn't like what I had to say. He was pretty short on the phone.

LuAnn said he was a smart ass.

AJ said I could have been more ignorant than I was, but and point out that his excavator operator was a transport driver. It wasn't even actually an excavator. Didn't even know the lines were in the hole.

LuAnn said Yeah.

AJ said But I left all that out, and he said thank you and hung up on me. So that's where it was left.

LuAnn said he hung up on me too.

AJ said it was their fault 100 percent.

LuAnn said 100 percent. And because I told these guys when Dallas was out here, if they had left Dallas out here to finish the job, we wouldn't have had that happen.

AJ said his biggest concern was this: he wasn't given the opportunity to fix it as a construction company.

LuAnn said yes.

AJ said I said, well, I don't know you from Adam, and I made the call. It was 100% my call. Whether you agree with it or not, that's what I did, and that's what it's meant.

LuAnn said Good for you. Thank you. Thank you. Because he was really nasty to me on the phone, and I didn't, and I couldn't, answer his questions. And I said, I know it wasn't an abandoned line, you dumbass. Why would we fix it if it was an abandoned line?

AJ said He kept arguing with me about that, and I said, I don't know where he got your information. It was an engineering flaw from somebody because I didn't tell anybody it was an abandoned line, so wherever you got your information from is incorrect.

Brandon asked so is this the broken water line by the bridge.

LuAnn said yes. Yes, when they had to move all the riprap that they put in there wrong.

Brandon said They don't want to pay the bill?

AJ said, kind of interesting because the engineer that was actually sitting there the day they hit it mentioned to me he's like, maybe I should have told him that

there was that those lines were there. So obviously the engineer that was there knew they were there anyway. It's taken care of, so LuAnn said Thank you, thank you very much. Okay, and then the other thing I have is Morgan Pavement will be here to do the seal coat on 800 and over by the church on Friday.

Mayor Beagley said You're on the ball.

LuAnn said, and that's all I have.

Mayor Beagley said Okay, Councilmember Arbon.

Trisha said I don't know that we really can do anything about it, but I chased down two people that are flying past my house 90 miles an hour. One stopped in front of my house. I think I got their attention pretty well. The other one I followed up to the RV park, and I got his attention. I've posted a sign out that says "Kids at Play. I and I just let them all know that if it continues to happen, I'm going to have a sheriff sitting out. We know the one.

LuAnn said we need to ask the sheriff to come out.

Trisha said I don't want a sheriff watching what's going on. So he was very apologetic and said he'd handle it. But I'm sick and tired of people. That one guy, that one kid, stopped at this stop sign, and he had been going 90 by the time he went past my house.

LuAnn said that's what they do pass our house. Do you know who the worst offenders are? One of the worst offenders is the cattle trucks. They roar. They've got to be going 90-100 miles an hour when they get to my house. I mean, they're flying.

Mayor Beagley said, and the potato trucks too.

LuAnn said Oh, I haven't noticed the potato trucks, but they were by my house.

Mayor Beagley said Just flying by there.

Trisha said So I don't know. I'm just letting you know that I did have a discussion with two people. I did let them know that if it continues. I'm gonna, you know, just have the sheriff come out.

LuAnn said we can request that they come out and patrol this road too, but they are super good about doing that.

Trisha said, you know, I think just one or two tickets, and it might get some attention.

Mayor Beagley said Okay, I'll get a hold of the sheriff's department.

LuAnn said Call our guy.

Mayor Beagley said Our guy. Okay.

Stacey said Well, he was out here last Friday because somebody locked. They said it was a brand new baby at the Fast Stop, and so we called the sheriff, and he came out, and he said that it was a dog, which was better than a baby. But anyway, he came and told us because we were all panicking too.

LuAnn said Yeah.

Stacey said Anyway, he's like, 'Well, what can I do for you today? I said, "Well, you can go, but set my yard if you want to patrol. So he did.

LuAnn said Oh, good.

Stacey said I don't know how long he stayed.

LuAnn said Yeah, because they're both they're welcome to hide out in my yard.

Trisha said I just think that if we have them, it will slow everybody down a little, and then they'll start again, and we'll have to do it again because that's just the nature of the business. The one kid, I said, my Hell, we've got all the flats, and we got all the freeways. You don't need the hot rod right through downtown Snowville.

Mayor Beagley said the bad thing about it's hit and miss.

LuAnn said And your grandkids are there all the time.

Trisha said they are. I say the first thing that's going to happen is you're going to get a ticket, or you're going to wreck, or you're going to hurt somebody, and then you're going to go to prison. So think about that.

Mayor Beagley said I would hate to go against you.

Trisha said I was politically correct.

Brandon said I'm sure you were.

Trisha said, bluntly, politically correct.

Mayor Beagley said Well, I kind of looked into it about if we appoint a person in town to do things like that. When it comes to speeding violations, it has to be an actual officer to write tickets and stuff like that. Yeah,

LuAnn said, yeah, but we can chew their ass.

Mayor Beagley said, yeah, but we could actually get an appointed person and get him trained to go around and give tickets for messy yards, ordinances, fees, you know, and everything else. We could do that according to fees.

Brandon said, let's get the fee set in place first.

Trisha said Yeah, let's get the fees one step at a time.

Mayor Beagley said And actually, they go through the police department, get their training, but they have to pass PT tests in physical fitness, just like a regular cop does.

Trisha said We're not quite that in town yet.

Mayor Beagley said But I looked into that.

Trisha said Anyway, that's all I have.

Mayor Beagley said Well, it's a sore subject with me. I seem to go by my house a

Stacey said they go fast.

Mayor Beagley said Public comments. Oh, I'm sorry. I messed up.

Trisha said It's all right there on the paper.

Brandon said You're following what they said. I put a check by him.

Mayor Beagley said Okay, public comments. Okay, well,

Tim Heyder said The Mosquito Box Elder Mosquito Abatement District has detected West Nile virus at a higher-than-average level. Treatment of mosquitoes in the larval and adult stages will be going on to decrease the threat of the virus. We ask that. We ask that Box Elder County citizens do their part by not allowing standing water on their property to help eliminate mosquito breeding sites. Anything that holds water for more than a few days can potentially produce mosquitoes. Take proper precautions if you are outside after dusk. Be sure to wear long-sleeve shirts and pants. Mosquito repellent with DEET, or before you can, is also a great way to avoid mosquito bites. If you plan on attending any outdoor events, such as the County Fair or Peach Days, please use the proper precautions to avoid mosquito contact. All of us are on the Facebook page and share updates on UNC activity for the county. So this last week or the last two weeks, they've had bites in Brigham City, Tremonton, Park City, Plain City, and Ogden. They've had bites. They've had bites in South Cornie. We have bites at the Bird Refuge.

LuAnn asked where West Nile was found. In which?

Tim Heyder said In all of them that I named.

LuAnn said Oh, all of them. Did they have actual West Nile?

Tim Heyder said Yes. West Nile. They are going to bring that cage out here and start checking out here.

LuAnn asked They going to come spray?

Tim Heyder said Well, not spray, and we check in to see if there's West Nile out there. If they find it, they won't say.

LuAnn asked Well, but are they going to spray for mosquitoes like they generally do, or not?

Tim said Well, they're going to see how bad they are.

Trisha said, I thought I've seen them spray out here a couple times already.

Tim Heyder said They do periodically.

LuAnn said I haven't noticed them yet. I haven't noticed any mosquitoes at my house though so far.

As soon as it rains, they think they want more mosquitoes. But there's probably, I don't know, seven cases in Box Elder County that they found this thing, so they are on the move. Anything is going to be the right place; they're recommending that you're going to County fair to go next week. So they will keep me updated, and I don't know what I can make where you want to put a cage. Be prepared. Walking at each. This is what your entrance to town looks like. Take that way for a week. I don't know who the owner is.

LuAnn said Now what? Now what is this?

Tim Heyder said That's your entrance to town.

LuAnn said That's what?

Tim Heyder said The entrance to town.

Mayor Beagley said Oh, okay. I see what you're getting now. It needs to be cleaned up more. Okay, I'll definitely talk to the owner about this. I don't know who the owner is.

Tim Heyder said the garbage has been done now. Was that way for a week? Did you guys look at the business license when I was the Mayor that we issued? Because there was, we didn't. They had a year to have it either Gravel, I mean oil, or put that compound down on, so it wasn't. When we issued the license, I assume they still have a license to park in there,

Mayor Beagley asked for the garage.

Tim Heyder said Yeah, no, for that we're in parking the trucks.

Mayor Beagley said I'll have to look into that.

Tim Heyder said Look into that and see if they do have a business license. That's what it looked like for a week. That's totally unacceptable. And I took those pictures around to different people that are not from this town and asked them in a couple of words.

Trisha said Looks like a dump site to me.

Mayor Beagley said Well, I will

Trisha said Have to find out the owner of the property and have a little chat and see about getting it cleaned up.

Tim Heyder said Well.

Trisha said it'll all be a due process.

Tim Heyder said they dumped that.

Mayor Beagley said I'm just wondering if people are. Town are dumping in the dumpsters there.

LuAnn said I wondered that same thing.

Mayor Beagley said Yeah, because it gets filled up really fast.

LuAnn said I wondered the same thing when I saw it. I'm like, all those butthole people are just dumping all their shit in there.

Mayor Beagley said we cleaned our garbage cans up here, and now they're pumping there.

Tim Heyder said Look at page two.

Mayor Beagley said Page two. Oh, they are parked on city property.

Mayor Beagley said Oh, okay.

Tim Heyder said I wonder if we ought to have them take that and put it right in front of them, so the public can't see the seat. Yeah. So the truckers can put their garbage in, but the public can't see those dumps. You know, outside of mine, the truckers can still put the garbage in.

Trisha, what do you think people are more offended about when they pull into town: the smell from Flying J or that garbage dumpster? I get what you're saying.

Tim Heyder said I just went out of town for a month, and I stayed in. I don't know.

Probably a dozen little towns. All the way from Kemmer, Wyoming, Logan, Medon, Smithfield, Swanville. I mean, I stay all the way to my house, Redone.

Mayor Beagley said Well, I would definitely look into it, and I'll talk to the owner. I'm sure we can come up with some type of solution for that.

Tim Heyder said Yes, by far, owning my own little town.

LuAnn asked Well, didn't somebody buy that property.

Tim Heyder said Well, I think they did. I think they sold it.

Mayor Beagley said Yeah, and he's extended that garage and stuff like that.

LuAnn said Yeah, I saw that they built on them back.

Mayor Beagley said That's a good idea. Okay. Anybody else have any comments?

Mayor Beagley said Okay, we're almost done here.

Mike asked do we have the expenses.

Trisha said Yes,

Mayor Beagley said We got the expenses, and adjourn.

Trisha said I will pass them doesn't they stopped at Jim.

Mayor Beagley said Oh.

LuAnn said, AJ, thank you for talking to that guy.

AJ said You're welcome.

Mayor Beagley said Okay. Do we have a motion to accept the expenses for this month? Do I have a motion from?

Mike said I'll make a motion to accept the expenses. Do we have any additions?

Tammie said everything should be on there.

Mayor Beagley said Do we have a second?

LuAnn said Second.

Mayor Beagley said Okay. All in favor?

Everyone there said, Aye.

Mayor Beagley said Any opposed? Motion passed. Do we have a motion to adjourn?

LuAnn said I make a motion to adjourn.

Mayor Beagley said Do we have a second?

Trisha said Second.

Mayor Beagley said All in favor?

Everyone there said, Aye.

Mayor Beagley said Any opposed? Motion passed. I think I'm going to eliminate this top part here. That just doesn't sound right.

LuAnn asked What?

Mayor Beagley said What I got out of the book. It says you're supposed to. Do you have a motion? And then you're supposed to ask, " Do I have a motion from

LuAnn said twice?

Mayor Beagley said Yeah. So I'm gonna eliminate that top one.

LuAnn said Yeah. Oh, you looked it up to make it official.

Mayor Beagley said Yes.

LuAnn said Good for you.
