Meadow Town Council
Meadow, UT 84644

Dear Mayor and Meadow Town Council,

I am writing to you today as a neighbor who is already part of the Meadow Town community. My residential building lot sits right next to the town limits, and the town has already welcomed me into the system by approving and installing my culinary water hookup outside the town boundaries. My goal is simply to work together with the Council to find a practical solution to get electricity to this lot so I can move forward.

I completely understand and respect the town's policy against expanding out-of-town utility connections, and I know you want to avoid setting a bad precedent. However, because I am already using and paying for town water here, this isn't a request to bring services to a completely new area. It's just a request to bring my power in line with the water connection we already established from the very beginning.

Since Dixie Power has officially looked at the lot and agreed that connecting to the Meadow Town lines running right in front of my property is the most logical path, I would love to talk about what option works best for everyone:

1. **First Choice (Out-of-Town Connection):** I would prefer to get an electrical connection through a simple, property-specific agreement. I am more than happy to include clear legal language stating that this is a unique exception based purely on my existing water hookup, ensuring it sets absolutely no precedent for anyone else in the county.
2. **Second Choice (Annexation):** If the Council feels that an out-of-town power connection just isn't possible under current policies, I am completely open to petitioning for formal annexation into Meadow Town. My lot sits directly north of a home that was previously annexed. Bringing my property in would cleanly square off the town boundaries for this section, making the town line seamless and logical—exactly how it looks like it was meant to be.

I consider myself a part of Meadow Town, and I am fully prepared to pay my share—whether that means municipal taxes, hookup fees, or non-resident rate premiums.

I'm happy to host a site visit, submit any paperwork, or look at any other ideas you might have. Let's work together to see what we can do to resolve this smoothly.

Thank you so much for your time and for everything you do for our community.

Sincerely,

Ryan D. Mundy
