

Public Hearing Information Handout

The annual standby fee has remained at \$500 since 2004. Since then, operating costs, including labor, fuel, and materials, have increased. The water system's needs have also grown, requiring additional maintenance and improvements. Revenue collected under the current fee structure is not sufficient to meet these needs.

Currently, 141 properties receive water from the system. A \$200 annual fee increase for each lot or parcel that uses water would generate approximately \$28,100 in additional revenue each year.

Vacant lots and parcels that do not use water will not be affected by the proposed increase. Their annual fee will remain \$500.

Lots and parcels that use water will have an annual fee of \$700.

Please note: These fees apply only to the Special Service District. Separately, the Beaver Dam Homeowners Association charges a \$300 fee for all lots and parcels that use the subdivision's roads and common areas. Therefore, vacant lots and parcels would pay \$800 per year and properties that use water would pay \$1,000 per year.
