Dear Members of the Washington County School Board,

As the Hurricane Intermediate School Community Council, we are writing to formally request an amendment to our current School Land Trust Plan for the upcoming academic year.

Our current plan restricts our School Land Trust funding solely to teacher salaries. While supporting certified staff remains a high priority, this narrow focus limits our ability to fully utilize our annual allotment and carryover funds effectively. To ensure we maximize every dollar allocated to our school, our council met and voted to request an expansion of our plan goals.

Specifically, we would like to amend our plan to allow funding for:

- **Paraprofessionals:** Adding paraprofessional support will enable us to provide targeted, small-group interventions in classrooms, ensuring we meet the needs of our diverse student population.
- **Technology:** Including an instructional technology category will allow us to maintain, upgrade, and integrate essential digital learning tools that directly enhance daily student learning.

By broadening our goal to include paraprofessionals and technology alongside teacher support, our council will be equipped to address our students' most pressing academic needs and fully deploy our allotted resources.

Thank you for your leadership and continued support of our students, teachers, and school community. We appreciate your consideration of this request.

Sincerely,

Hurricane Intermediate School Community Council

Mark Christensen, Principal
