## **Agenda**

**BEMS Studies**  
- Madisen  
Hillebrant-Openshaw

- Madisen Hillebrant- Openshaw Data Analyst, presented on EMS Mental Health and Retention study. Due to occupational stress and immense amounts of trauma that they experience, EMS providers are at high risk for stress, burnout, anxiety, depression, PTSD, substance use and suicide.
- Mission to get a better idea of what mental health looks like in our Utah EMS population.
- Proposing to use a third party to collect data anonymously, working with DHHS.
- Create a Mental Health data survey
- Data will be collected anonymously, housed at DHHS, won't be linked to licensure or subject to GRAMA.
- Purpose of gathering data to better understand what mental health looks like in our Utah EMS personnel, to better support our providers and improve awareness and resources accessibility
- Capture feedback from personnel. Track data overtime to determine changes or improvements, education programs, and add resources.
- Review the Outline of Survey questions. Please provide Madisen feedback.

Slides presented:

Review Outline of Survey Questionnaire, provide Madisen feedback.

# EMS Mental Health and Retention

## THE PROBLEM

- Occupational stress can lead to mental and physical health disorders (Hashmi, 2015; Mountfort & Wilson, 2022)
- EMS providers experience high rates of stress leading to burnout, anxiety, depression, PTSD, substance use and suicide (Alghamdi, 2022)
- Rates of these disorders are higher in EMS personnel than the national average (Petrie et al., 2018; Vigil et al., 2019)

## THE PURPOSE

- Preliminary analyses of offense data shows DULs, and domestic violence
- Loss of several firefighters due to suicide within the last year

## PROVIDE BETTER SUPPORT

- Better understand rates of mental health disorders in Utah EMS providers
  - How do we compare to other states and the nation?
- Who has the highest risk?
- Do EMS personnel know about mental health resources?
  - Is the state providing enough education about resources?
  - Does training prepare personnel for the stressors they experience?
- Are EMS personnel using mental health resources?
  - Do the resources help?
- How can we better support our providers?
- Track this information over time to determine changes/improvements

| <b>Administrative Rule Review</b><br>- Director Erik Bornemeier, Mark Herrera, Kate Carlson                    | Kate, there are some draft rules pending approval. Erik, Mark and Kate have been working on getting those rules updated. The goal is to distribute to the EMS Committee Members for review and get feedback. Will distribute all information by email, and request feedback. <ul style="list-style-type: none"> <li>Feedback deadline changed from August 01 to August 14, 2026</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | BEMS will distribute rule review email to EMS Committee Members to provide feedback by August 14, 2026. |

**Operations  
Subcommittee  
Report**

- Robert Ayres

- a. **Meeting in May**  
b. **Reviewed the States Proposed Scope of Practice Document by Dr. Taillac.**
- Sub committee members had several questions and confusion.
  - Provided feedback to Dr. Taillac via email.
  - Questions on how States Proposed scope of practice interacts with protocols, does it supersede protocols, is that document protocol.
  - General feeling was that the state should provide flexibility in the document and allow the agency Medical Directors to Limit where they see necessary and expand in some areas where that's necessary, especially in rural areas.
  - AEMT's being allowed to do needle decompression. His agency probably would never allow that. But in rural agencies that would be very important as a life saving measure.

**Q/A**

- Peter, commented the aid Scope of Practice Chart, is designed to reflect what's in the protocol guidelines as a quick look chart that is like the National Scope of Practice Model practice model put out by NHTSA.
- Peter, feels strongly this is a bit of a technicality and that needle thoracostomy should be within the scope of AEMT's in our state even though it's not in the national scope model.
- Peter, it's important to keep in mind that the National scope of practice Model, is a model that states are designed to use and modify to meet the needs of their state.
- Peter, likewise, our protocol guidelines and the proposed scope of practice document we would like to put out are guidelines for EMS agencies and their Medical Directors. Your medical director may not want AEMT's to perform needle decompression which is fine. That's between you and your Medical Director.
- Peter, other agencies may want to include this.
- Peter, Tension pneumothorax kills those people in minutes. In rural areas those minutes could be very long in transport.
- Peter, that's why I think it's important to give them that ability to train properly and test their folks on the use of that skill when necessary.
- Peter thanked Robert for his vital input and really good conversation to have.

More discussion.  
Peter will review and our plan is to send the States Proposed Scope of Practice Document out with the Protocols.

**Operations  
Subcommittee  
Report**

| <p><b>Professional Development Subcommittee Report</b><br/>- Rachel Stweart</p> <p><b>Professional Development Subcommittee Report</b><br/>- Rachel Stweart</p> | <ul style="list-style-type: none"> <li>• Last meeting was May 20</li> <li>a. talked about scope of practice, needle decompression.</li> <li>• Which was a big topic for the educational component. Who then would be responsible to teach that, would it lay on the Agency that chooses to allow AEMT's to perform the needle decompression. Or would it be on the initial courses at the AEMT level for the entire state.</li> <li>• Currently all our initial courses are at the NREMT standard. For now it's not on initial courses or Course Coordinators to teach. It'll be on the responsibility of the agency and the Medical Director that over see's them.</li> </ul> <p style="text-align: center;"><u><b>Q/A</b></u></p> <ul style="list-style-type: none"> <li>• Peter, inquired what burden it would be on our AEMT course to add that skill.</li> <li>• Rachel replied it wouldn't be a big burden as far as time. It's more equipment and the cost of equipment to provide to the students.</li> <li>• Peter, ideally the training is given to every AEMT in the state. Then it's under the discretion of the agency that hires them whether to allow them to perform or not.</li> <li>• Peter, requested to find out the burden and impact it would have on adding to the course.</li> <li>• Mark, mentioned future plans to add a training module to the statewide platform module.</li> <li>• Rachel, and ensuring course coordinators and students understood when they go to get their NREMT Certification, don't be confused as it's not on National practice, and that's it's just a state module.</li> <li>• Rachel, another difficulty where to carve in the time for it. Providing them with the curriculum Module would be the best answer.</li> <li>• Peter, the national level scope of practice model is going to be updated again in the next couple of years.</li> <li>• Peter, we've succeeded with getting the AEMT's to be able to use opioid medications which wasn't in the national scope before. practice. Came up with a restricted list to add to scope of work. This would be a good thing to add to it.</li> <li>• Leslie Montgomery mentioned their</li> </ul> | <p>Rachel to measure time burden it would be on the AEMT courses to add needle decompression to it. Provide feedback.</p> |

**Course Coordinator Discussion**

- Joseph Mittleman

Joseph Mittleman, Murray City Fire Chief, provided a presentation on "Alternative Institutional Approval Pathway to the Utah EMS Course Coordinator Endorsement Proposal."

Rachel will send an invite to Chief Mittleman to the next Professional Development Subcommittee meeting August 19.

**Course Coordinator Discussion**

- Joseph Mittleman

**Alternative Institutional Approval Pathway**  
Utah EMS Course Coordinator Endorsement Proposal

**Why am I Here today?  
Cause and Effect**

- Utah is currently Short Paramedics
- Utah Paramedic replacement rate is below the State Needs.  
This is not due to a lack of applicants to the programs  
Both UVU and School of EMS had to turn down qualified applicants
- Costs for EMS agencies are directly affected by the replacement rate from Utah Paramedic Programs

**Proposal**

- Recognize accredited higher education oversight in lieu of mandatory co-ordination.

**Course Coordinator Discussion**

- Joseph Mittleman

**Current Challenge**

Limited co-coordinator opportunities create barriers for qualified EMS educators.

**Proposed Solution**

Allow institutional recommendation from approved paramedic programs.

**Rationale**

- Existing academic supervision already evaluates teaching, leadership, and compliance.

**Institutional Review Process**

Program Directors and academic leadership already assess readiness of their staff and potential outside coordinator applicants.

## Course Coordinator Discussion

- Joseph Mittleman

### Benefits

Expanded access, reduced administrative burden, maintained accountability.

### Quality Assurance

- All existing Bureau oversight, audits, and endorsement requirements remain if that's what BEMS would like.

### 2 Recommendations for Clarity within the Coordinator Manual

- Accept institutional approval as an alternative pathway to endorsement.
  - Except all past expired coordinators to allow to reentry into the educational system. Being expired does not mean you've lost any knowledge of how to run a course.
- 
- Chief Mittleman proposed the existing academics need to be able to recommend coordinators without a Co Coordinator status. They would still have to be instructors in the state. They would have to meet rigorous academic standard for these institutions. So this would not be for a non accredited school or a private school without a college CAAHEP or COAMFTE. This would only be for academic institutions.
  - Except all past expired coordinators to allow reentry into the educational system with being lapsed.
  - Chief Mittleman proposed immediate recommendations for the EMS Committee board to recommend to EMS Director Bornemeier to allow this rule change for these two recommendation proposals.

Q/A

|                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                     |

| <p><b>Course Coordinator Discussion</b><br/>- Joseph Mittleman</p>             | <ul style="list-style-type: none"> <li>• Erik, there's attainment, maintainment and re-gainment. You do bring up a point. How do we build capability and capacity of action in the State of Utah. That's priority, we need to make sure we are creating really good course coordinators. The success of our school houses depends on the Course Coordinator. It's very critical. Co knowledge is the success of the student populace. It's not just the instructor, it's the course coordinator making sure those things get done. We do lean heavy on that course coordinator making sure that the milestone is attained. We do need to make it effective. Things do change and we need to make sure we are in step with our course coordinators.</li> <li>• Mark recommended to have the Professional Development Subcommittee take on for review.</li> <li>• Clair, supports that idea to have the Professional Development Subcommittee take that on for review.</li> <li>• Rachel, will make sure she invites Joey to their next subcommittee meeting.</li> <li>• Clint Smith, supports being presented to the Professional Development Subcommittee for review and report back to EMS Committee at the next scheduled meeting in October.</li> <li>• Chief Kirk Mittleman, commented that within the next couple of years the NAEMT program is going to have to be accredited through CAAHEP or COAMFTE. We need to get ahead of this because if you don't with the AEMT and Paramedic level your numbers are going to drop. There's a huge call for this Nation wide.</li> <li>• This was referred to the Professional Development subcommittee for further review. Next meeting August 19.</li> </ul> |                     |
| <p><b>Air Ambulance Subcommittee Format</b><br/>- Director Erik Bornemeier</p> | <p>Erik, Air Ambulance Committee existed under state statute.<br/>Discussed purpose and mission of format to form a new Air Ambulance &amp; Air Rescue Subcommittees.<br/>Each county is collecting great data, but data is not being processed, it stops at county level.<br/>Data Intel Governance</p> <ul style="list-style-type: none"> <li>○ Goal with subcommittee capture subject matter, data reporting, process and analyze</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <p>More to Come</p> |
