CLEARFIELD
UTAH'S MILITARY CITY

Background

- *At the January 2026 retreat, council voiced wanting to focus on neighborhood beautification.*
- *Work session on June 23rd clarified that council wants art in the neighborhoods and some level of resident involvement.*
- *City council selected fire hydrant art at the Aug. 14 retreat and expressed that each neighborhood should be themed.*
- *The Youth Commission met at the end of Sept. to determine theme recommendations to the council.*

Logistics

- *Clearfield owns the fire hydrants (1,531).*
- *The fire hydrants can be painted any color; the tops don't need to be specific colors.*
- *We can't paint on the threads.*
- *Public Works uses a different paint type than muralists, so more research will need to be done on paint.*

Youth Commission Recommendations

- *The commission was tasked with giving six theme recommendations.*
- *They were so excited and couldn't decide.*
- *They gave staff 28 theme recommendations.*
- *Staff grouped their recommendations into six categories.*

Six Themes Summarized

- *Disney/superheroes*
- *Food*
- *Meeples (people caricatures)*
- *Nature*
- *Art styles and/or mediums (abstract, hippie, crayons, stained glass, etc.)*
- *Animals*

Stained glass
fire

fruits/veggies
flowers/Nature
cactus
Absract
Crayons
campbells soup
city scape
Mario
fire fighters
sports balls
Hippie
Artwork
TMNT
Soda cans

Selecting Hydrants

- *The newer hydrants don't leak much.*
- *The oldest hydrants were built in the 1940s and do leak with temperature changes.*
- *Recommend we select streets with newer hydrants, specifically fire hydrants less than 30 years old.*
- *Recommend selecting hydrants on high traffic roads for age and visibility.*

Next Steps

- *How many themes? Six is arbitrary.*
- *What themes would you like?*
- *What level of public involvement should we do on selecting themes?*
- *Do we want students to design and paint them? If so, what level of education?*
- *Preference on the road type for art installation?*
- *Do we do them all in one spot? Or scattered throughout a neighborhood?*
