JM

Hello Mr Dalley,

Before moving forward, I'd like to receive all information on the proposed easement and transmission powerline project. This includes plans, design, timelines, materials related to construction, operation, maintenance, future plans and/or changes, and any other relevant information to the project and desired easement. I'd appreciate it.

For now, email is the best way to communicate regarding this matter.

Thank you,

Jennifer Mann

Please let me know what form of communication works best for you moving forward. The City is happy to proceed by email, phone, or in-person meeting, depending on your preference. Payson City is desirous to keep the electrical project moving forward and would like to work with you toward reaching an agreement that allows the project to move forward. Please let me know how you would prefer to proceed with negotiations.
