Hello,

I'm writing to express my frustration and concern regarding the extremely loud amplified music occurring tonight, October 23, in the St. George area.

I live in the Tonaquint area, almost 3 miles from the convention center, and the bass from this event is loud enough to be heard inside my home. We are running fans and noise makers and can still hear and feel the music in our home.

I contacted police dispatch and was informed that the event has a permit issued by the city.

While I understand the importance of supporting community events and entertainment, I question why permits are being granted that allow this level of noise to disrupt surrounding residential neighborhoods so late at night.

I would appreciate answers to the following questions:

1. What event was granted the permit, and where is it being held?
2. What are the permitted hours and noise limits?
3. Does the city consider the impact on nearby residential neighborhoods when approving amplified outdoor music?
4. What steps can residents take to prevent this level of disruption in the future?

I'm not opposed to events or live music, but I believe there needs to be a reasonable balance between entertainment and residents' ability to enjoy peace and quiet in their homes.

I would appreciate a response and would like this complaint documented for consideration when future permits are issued.

Thank you.

Kristin Draper
