Program Request - Abbreviated Template
Utah Valley University
AAS Drafting Technology to Engineering Design Technology Name Change
08/01/2016

Section I: Request

The Department of Engineering Graphics and Design Technology in the College of Technology and Computing at Utah Valley University requests to change the name of the Associate in Applied Science degree from Drafting Technology to Engineering Design Technology effective Fall 2016.

Section II: Need

This change is necessary to align the program name with the industry served. Drafting/Design programs across the state and nation are modernizing their names to either Design Technology, in the case of most high schools and community colleges, and to Engineering Design Technology or variant of this at most universities. For example, Weber State University has recently changed their AAS and BS degree names to Design Engineering Technology.

Section III: Institutional Impact

The name change is expected to provide greater clarity to students and the industry served. It is also expected to have a positive effect on enrollments.

No new resources are anticipated to support the name change.

One new course, EGDT 1050 – Introduction to 3D Printing, was added to be one of the electives. This change provides a wider selection for the students and enables our graduate to be better-prepared to engage in diverse design, modeling, and drafting disciplines.

Section IV: Finances

No new funds will be required for this change.
