CATEGORICAL EXCLUSION FROM ENVIRONMENTAL REVIEW

As required by the guidelines for the preparation of environmental impact statements (EIS), a preliminary evaluation has been performed on the proposed State of Utah, Drinking Water Board project identified below to determine if an environmental review or EIS is warranted. The State of Utah has elected to "Categorically Exclude from further environmental review" the proposed drinking water project.

Project: Eagle Mountain City North Area Transmission Pipeline

Water System No. UTAH25142

Office Location: 1650 Stagecoach Run
Eagle Mountain, UT 84005

Project Number: 3F254

Total Estimated Cost: \$3,366,805

Federal SRF Loan: \$2,895,000 (1.8% for 20 years)

Eagle Mtn. Contribution: \$ 500,000

This project consists of the installation of approximately 4 miles of 16-inch PVC pipeline. The project does not cross any wet lands, does not affect any endangered or threatened species, or affect any cultural or historical properties, and will be constructed within an existing, previously disturbed, right-of-way for other utilities. The project is needed in order to meet current and future demand for drinking water.

The review process indicated that the proposed project will not adversely impact the environment. Consequently, a decision has been made to not prepare an environmental impact statement (EIS). The State of Utah has elected to "Categorically Exclude from further environmental review" the proposed drinking water project, based upon the careful review of the following report.

Categorical Exclusion for the Eagle Mountain City North Area Transmission Pipeline; Jones & DeMille Engineering; 12/3/2015.

Any and all contractors will be required to comply with all relative federal, state, and local laws, regulations, and executive orders; such as Utah State air quality regulations R307-309. If

anything is uncovered or otherwise discovered during construction of the water system improvements that may have cultural or historic significance Eagle Mountain City will be required to stop construction and notify both the Division and the State Historic Preservation Officer. These two agencies will investigate any such discoveries. If it appears that construction work may be causing an adverse environmental impact Eagle Mountain City will be required to stop construction and notify the Division. The Division will investigate any such discoveries.

A Categorical Exclusion (Cat Ex) from environmental review does not require a formal public hearing or a formal public comment period prior to the Cat Ex becoming effective. Therefore, this Cat Ex will become effective on the day it is published in a local newspaper, which is expected to occur on or about December 18, 2015. Questions or comments may be directed to James H. Martin, P.G., Division of Drinking Water, at (801) 536-4200.
