FROM: Pine View Ditch Unit 43

DATE: May 19, 2016

SUBJECT: PINE VIEW IRRIGATION

The Granite Ridge developer has torn out hundreds of feet of concrete irrigation ditches and appendages and has interrupted the use thereof and impacted us, as the users. Please require the developer to replace the concrete waterways, cleanouts, and appendages to their original condition without delay to insure that we have the ability to retain our continued unlimited access to the waterways—see picture attachments of “Granite Ridge’s Replacement Project”.

We have confidence in our mayor being a construction owner and “pipe laying expert” that the Granite Ridge Replacement Project will be inspected, done properly, and in accordance to required practices and codes.

6" pipe

8" pipe

~~60" PIPE going west~~

~~Very poor pipe laying!~~

Leak
this one

please
