Rabies Prevention & Control Regulation

Davis County Board of Health

February 12, 2019

Findings of Fact

- The Davis County Board of Health passed the original *Rabies Prevention & Control Regulation* on November 12, 2013.
- The proposed updates include:
  - Reducing the quarantine period for unvaccinated animals exposed to a rabid animal from 6 months to 4 months;
  - Defining animals whose vaccination status should be enforced by animal control;
  - Revising previous language for clarity.

Report of Public Hearing

- The Board of Health held a public hearing on December 20, 2018 at 5:00pm at Davis County Health Department.
- Written comments were received until December 27, 2018.

Summary:

- No comments were received.

Conclusions of Law

- The proposed changes to the *Rabies Prevention & Control Regulation* have been reviewed and commented on by the general public and interested parties.
- The proposed changes to the *Rabies Prevention & Control Regulation* will continue to protect the public's health.
