

South Ogden & Riverdale

Interlocal Agreement Proposal

Concerns

- Benefits to the cities without Washington Terrace
- Staffing of Fire Engines
- Cost savings and efficiency
- Alternatives to a Fire District/consolidation
- Cost effective staffing model
- Mutual/Auto aid misconceptions

Proposal

Interlocal Agreement Between Riverdale and South Ogden

- Combined administrative oversight
- Working towards a single ambulance billing
- All city functions remain the same
- Cities retain assets

Similar Agreements

Snohomish County Fire Districts 7 and 3 take first steps to merge operations

Both Boards of Fire Commissioners for Snohomish County Fire District 7 and Snohomish County Fire District 3 signed an interlocal agreement in December that allows them to share administrative functions in 2016. The goal of this step to merge operations is to help each agency operate more efficiently, improve service for the community, and eliminate redundancy.

Response Improvements

- Effective use of the “First Responder” concept
- Staffed Fire Engines at both Riverdale and South Ogden with three each
- Effective use of ambulances
- GPS of closest EMS and Fire units to an incident
- Full Command Staff response
(Incident Commander, Safety Officer and Support Officer)
- Increased safety for personnel and citizens

Staffing Proposal

Current Staffing

- Riverdale
 - *Four 24/7*
- South Ogden 81
 - *Four 24/7*
- South Ogden 82
 - *Three 24/7*

Departments are struggling with part-time staffing, two person Engines are common, with a few one person Engine situations.

Proposed Staffing with Agreement

- Riverdale
 - *Three 24/7*
 - *One 12/7*
12-hour shift as floater and minimum staffing for both cities
- South Ogden 81
 - *Five 24/7*
Riverdale Firefighter to work out of Station 81
- South Ogden 82
 - *Three 24/7 as a "Pumpulance"*

Proposed Staffing Model/Response Concept

- **Riverdale 41**

- Engine 41 would be the first-responder unit to Riverdale westside of the bridge, Heavy Rescue 41 covering all vehicle accidents, and Engine 41 responding to all reported structure fires.
- Reserve ambulance placed in service once 81 units are busy.

- **South Ogden 81**

- Ambulance 81 would be the primary ambulance for Riverdale and current South Ogden response area. Washington Terrace as First Responders to east end of Riverdale.
- Ladder 81 staffed with crews and used to cross staff reserve Ambulance 811.

- **South Ogden 82**

- Three handed transport Engine always in service, with three firefighters from Weber Fire District Engine 64 assisting as a first responding unit.

Fire Response Standards

- 60 Sec / 1 Minute (90%)
Turnout Time
- 240 Sec/ 4 Minutes (90%)
Travel time first arriving Engine company
- All Engines assigned arrive within 8 minutes
- 16 personnel minimum initial alarm at a residential fire
- 27 personnel minimum for a Strip Mall or Garden Apartments

Initial Alarm Deployment of Firefighting Personnel

EMS Response Recommendations

NFPA 1710 5.3.3.1 EMS System Functions

- Initial response to provide medical treatment at the location of the emergency (first responder with AED capabilities or higher)
- BLS response
- ALS response

NFPA 1710 5.3.3.3 Service Delivery Deployment

- The fire department shall adopt service delivery objectives based on time standards for the deployment of each service component for which it is responsible

NFPA 1710 Travel Time:

- First Responder – 4 min
- BLS and ALS Units – 8 min

Ambulance Turnaround Concept

The availability of ambulances to respond to emergency calls is related to their ability to return to service from the hospital. Extended hospital turnaround times decrease the number of available unit hours ambulances are deployed, which in turn can increase coverage costs or sacrifice coverage.

EMS Call Per Day and Hours Out of Service

Time to Boarder/Area

- Riverdale
 - Ogden Regional – 5 min
 - McKay Dee – 6 min
- South Ogden Station 81
 - Ogden Regional – 2 min
 - McKay Dee -2 min
- South Ogden Station 82
 - Ogden Regional – 1 min
 - McKay Dee – 4 min

- Riverdale
 - 2.5 PDA/1.87Hrs OOS
- Station 81
 - 2.3 PDA/1.72 Hrs OOS
- Station 82
 - 2.8 PDA/1.8 Hrs OOS

Changes Under Agreement

- Riverdale
 - 1.5 PDA/Minimal OOS Time
- Station 81
 - 4.8 PDA/3.6 Hrs OOS
- Station 82
 - 2.8 PDA/1.8 Hrs OOS
