**Subject:** GIS ordinance amendment

Bart/Ina,

I would like to get on the next MSD agenda, May 3<sup>rd</sup> to present on the attached draft ordinance amendment. This was adopted by the County Council but is not in the metro's ordinances.

This ordinance would require developers to provide GIS data of the storm drain facilities they are installing. We currently receive the plans but if we received the GIS data it could easily be added to the existing GIS database. We have recently used funds to collect GIS data on the existing storm drain. I think it would be prudent to have the data kept up to date by requiring developers who install storm drain to give us GIS data. I have discussed this ordinance amendment with the Magna council.

Let me know if you have any questions,
