Mayor / Council:

Here is the information that our insurance broker was able to provide. The percentages represent 537 claims. See you tomorrow!

JJ

Subject: Snowplow Claim Data

JJ:

It was nice to speak with you this afternoon. As a follow-up to our conversation, I've included some claim data below on Snowplow claims among all clients occurring last winter (11/1/18 – 4/1/19)

Snowplow Claims	
Parked Vehicle	31%
Mailbox	27%
Moving Vehicle	22%
Inanimate Object (e.g. Fence, Basketball Hoop, etc.)	19%
Pedestrian	1%

One point of clarification, some of the vehicle claims did not result from the snowplow coming into direct contact with the vehicle, but rather the damage was caused by the snow being pushed by the snowplow. Either way, if the vehicles were not located on the street the damage to the vehicles would not have occurred.

I would be happy to respond to any questions or provide any clarification on this issue at your convenience.

Best regards,
