Subject: [EXT:]Kloudis fence extension application

Hi,

I wanted to give my input on the Kloudis Fence extension application. I am the neighbor that sits directly behind the Kloudis home. As you know this is a multi family building with two neighbors on either side and the condo/townhome sits on a hill above my property. Because of the close proximity of our homes and also because their building is elevated to my home there is a great lack of privacy between our two homes. There's basically a direct line of sight between their bottom floor windows my bottom floor windows. No matter where I am in the back side of my home I can see into their house and they can see into mine. If either of us are on our patios at the same time we're looking directly at each other and do not have any privacy. Additionally if they have their porch light on at night it shines directly into my bedroom window. I often keep my blinds closed on the backside of my home in order to have privacy. I am in support of them extending their fence to 8 feet and plan to apply for an 8 foot extension for the entire backside of my property so that I can also extend my fence and have privacy in my yard and home. I'm going to send another email with some pictures demonstrating the issues we have.

Sincerely,

Bridgette Higgins

These pictures were taken from my bedroom dining room and kitchen windows and demonstrates the direct line of sight into each of our homes.
