

1500 S Lehi – Inter-Neighborhood Commute Traffic Pattern

The addition of 1500 S in Lehi has created an alternate route through a neighborhood of street-facing street-side homes for south Lehi, Saratoga Springs, and Eagle Mountain traffic that avoids the traffic signal at Center St and Pioneer Crossing. In addition, this route allows for a free right turn onto Pioneer Crossing as a third lane is opened starting at the intersection of Pioneer Crossing and 300 East thus avoiding any wait time encountered on the previous route at the intersection of Center Street and Pioneer Crossing.

This has resulted in a high volume of traffic traveling well above the speed limit through a densely child populated neighborhood creating a true safety hazard to those living in the neighborhood.

1500 S Lehi – Inter-Neighborhood Commute Traffic Pattern

Possible Solutions

1. Time restricted left turns onto 300 E from Pioneer Crossing when heading westbound during rush hour via stop light or enforced signage
2. Time restricted right turns onto 1500 S from Center street when heading northbound on Center street during rush hour via enforced signage
3. Introduction of a stop sign along 1500 S at the intersection of 200 E and 1500 S
4. Introduction of a stop sign along 300 E at the intersection of 1500 S and 300 E
5. Addition of radar speed limit sign along 1500 S
