Acknowledge Addendum(s):

This proposal is based on the division 16 specification, electrical drawings and/or modified below.

This proposal is to provide and install new electrical equipment to supply power to new HVAC equipment to be installed in the town Rec. Center.

The project is to upgrade the existing electrical service with equipment suitable to supply multiple circuit breaker load centers (circuit breaker panels) as well as replace an existing load center with a larger, higher capacity load center.

Additionally, the connection of the new HVAC equipment to the new load center. This proposal includes all materials and labor necessary for a code legal installation.

BASE BID AMOUNT: \$ 4200.00 This price is good for 30 days from the above date.

Note: Any electrical items shown on drawings or specification other than the electrical drawings are EXCLUDED. this proposal is submitted under the agreement, that, if accepted our retention % will be no more than the general contractors. Further, our retention will be held only to the extent that it is being held by the owner until completion of the electrical work and not because of other trades. It is expected that a subcontract agreement will be tendered to Axis One Group that complies with the most current AIA standard subcontract language.
