1. Sewer Lagoon

Anthony asked the council members if they received an email from Paul Krauth with the latest sewer sampling report; all members responded yes. Anthony stated the south pond

needs to be filled with water and then compacted but stated there are issues with the valves being either corroded shut or corroded in the open position. Council Member Justin Rowlette asked why we need to put the south pond in to use if the north pond is cleared up and good? Anthony responded, because there is very little space for it to be living in above the sludge and water level. It does not have enough living space.
