

What constitutes "short-term?"

Short-term projects for the committee to explore and plan for:

Achievable projects within 2 years

Cottonwood Canyon rental car snow-tire policy change, Trails improvement projects, Trailhead bathrooms, Mass transit improvements and incentives, Trailhead parking

Achievable projects within 1 year, Achievable projects within 2 years, Achievable projects within 3 years

Cottonwood Canyon rental car snow-tire policy change, Increased police enforcement for snow-tires in the Cottonwood Canyons, Trails improvement projects, Trailhead bathrooms, Mass transit improvements and incentives, Trailhead parking, Communication Program

Achievable projects within 2 years

Trails improvement projects, Trailhead bathrooms

Achievable projects within 2 years, I'm not sure if it's a time frame that defines "short term" as it is the principle that a project is well-defined. So: no planning projects, hopefully nothing terribly controversial for stakeholders, hopefully providing some PR value.

Cottonwood Canyon rental car snow-tire policy change, Increased police enforcement for snow-tires in the Cottonwood Canyons, Additional snow removal vehicles to improve roads, Increased traffic control vehicles, Trails improvement projects, Trailhead bathrooms, Mass transit improvements and incentives, Trailhead parking

Which partner agencies should be invited to sit on the committee?

UTA, The Forest Service, UPD

Communication program to inform individuals of condition of transportation corridors to the Canyons.

UDOT, UTA, The Forest Service, UPD

The Forest Service

I would define short-term projects as efforts that do not require substantial planning, permitting or approval process. To the extent possible, short term projects should strike a balance between project areas roughly aligned with the Mountain Accord systems: Environment, Transportation, Recreation, Economy, so as to build good will with wasatch mountain stakeholders. Prioritize "needs" (trailhead restroom maintenance, strategic transit improvements and other congestion mitigation actions) but acknowledge "wants" (new trail connections).

Committee membership should prioritize entities with authority or jurisdiction, and/or resources. SLCO, SLC, UDOT, UTA, USFS, Park City...I'm checking a couple boxes below for up canyon representation from the SHC, and also a trails person; there's so much energy and advocacy for trails improvements and I think Trails Utah is the appropriate conduit for that in the context of a committee that could vet and prioritize all the various input on trails.

The following question is requiring me to check a box and I am not going to suggest a name. I am checking a box just to be able to submit the survey.
