- **November 5:** Planning Commission
- **November 10:** City Council
- **November 11:** Veterans Day, Offices Closed
- **November 24:** City Council
- **November 26-27:** Offices Closed for Thanksgiving Holiday

MAYOR'S MESSAGE

I wish to express a heartfelt thank-you to each of you for all that was accomplished this past month during and after the big wind storm. Never have I seen a larger storm with as much damage. It was with mixed emotions as I toured the City to survey the damage. I witnessed destruction that was almost beyond my ability to comprehend. I also witnessed the greatest community in full swing and it was truly an amazing sight.

Literally, and I hate the term literally and yet it sure applies here, there were 1000's of people with hundreds of saws, trucks, and trailers going to town on the downed trees. What a sight!

It truly lifted my spirits and it was at that moment that I knew that not only would we survive the giant wind storm, but we would also survive the giant storm we have come to know as 2020. As I returned home to work on my own damaged trees, I found my neighbor there with a saw and trailer already at work cutting up the carnage. You are amazing citizens of an amazing community. People that not only know but understand and live to love thy neighbor.

As most everyone knows, we as a City opened up the property at approximately 3000 N 1050 W as a temporary green waste dump site to handle the green waste generated from the storm. We have a pile that is about 4 acres by 20 feet tall packed tight by heavy equipment. It is a tremendous amount of waste and we are working on a solution to dispose of it appropriately. Our intent is to chip/shred all that we can and make it available back to the community. Any larger logs we hope to make available for use as firewood. The City did declare a state of emergency to be able to help get some assistance from the State. We are hopeful that some of the necessary equipment will be available to accomplish our plan. We must all realize that we are not the only community that was affected by the storm. We will need to be patient in waiting for our turn to use the equipment. The temporary green waste was meant to be just that "temporary". We have closed this site and it will no longer be available for dropping off your greenwaste.

That said, it did drive home the need for a green waste facility somewhere in the city and we are looking at possible sites that could and would work well into the future. Sounds easy, but it is proving to be very challenging.

Lastly, the City Council in a spilt vote decided to not enter into a contract with connections Magazine. They opted instead to boost up production of our own City Newsletter. So hopefully, this message found its way to the new and format.

As always, thanks for caring, thanks for all you do, and thanks for being good neighbors. I am committed to doing whatever it takes to ensure that we remain the best place to not only grow up, but the best place to grow old.

Mayor Leonard Call

PUBLIC WORKS UPDATE

There are many variations of passages of Lorem Ipsum available, but the majority have suffered alteration in some form, by injected humour, or randomised words which don't look even slightly believable. If you are going to use a passage of Lorem Ipsum, you need to be sure there isn't anything embarrassing hidden in the middle of text. All the Lorem Ipsum generators on the Internet tend to repeat predefined chunks as necessary, making this the first true generator on the Internet. It uses a dictionary of over 200 Latin words, combined with a handful of model sentence structures, to generate Lorem Ipsum which looks reasonable. The generated Lorem Ipsum is therefore always free from repetition, injected humour, or non-characteristic words etc

FOLLOW THE FLAG

Exposure science studies human exposure to environmental contaminants by both identifying and quantifying exposures. Exposure science can be used to support environmental epidemiology by better describing environmental exposures that may lead to a particular health outcome, identify common exposures whose health outcomes may be better understood through a toxicology study, or can be used in a risk assessment to determine whether current levels of exposure might exceed recommended levels. Exposure science has the advantage of being able to very accurately quantify exposures to specific chemicals, but it does not generate any information about health outcomes like environmental epidemiology or toxicology

WINTER PARKING

Environmental health is the branch of public health that is concerned with all aspects of the natural and built environment that may affect human health. Other terms referring to or concerning environmental health are environmental public health, and public health protection / environmental health protection.

SANTA'S COMING

Environmental health professionals may be known as environmental health officers, public health inspectors, environmental health specialists, environmental health practitioners, or sanitarians. Researchers and policy-makers also play important roles in how environmental health is practiced in the field.

In many European countries, physicians and veterinarians are involved in environmental health

PVPD MESSAGE

In the United Kingdom, practitioners must have a graduate degree in environmental health and be certified and registered with the Chartered Institute of Environmental Health or the Royal Environmental Health Institute of Scotland.

In Canada, practitioners in environmental health are required to obtain an approved bachelor's degree in environmental health along with the national professional certificate,
