

**MINUTES**  
**Springville Water Advisory Board Meeting - NOVEMBER 12, 2020**

---

MINUTES OF THE SPRINGVILLE WATER ADVISORY BOARD MEETING WAS HELD ON THURSDAY, NOVEMBER 12, 2020 AT 6:30 A.M. VIA ZOOM.

**Committee Members in Attendance:** Rollin Hotchkiss, Nile Hatch, Rod Andrew, John Clemons, Calvin Crandall, Cl. Jensen

**City Staff:** Marcie Clark, Shawn Barker

**CALL TO ORDER**

Mr. Hotchkiss welcomed everyone and called the meeting to order.

**APPROVAL OF THE MINUTES**

Mr. Hatch made a motion to approve the September 10, 2020 minutes. Mr. Clemons seconded. All were in favor.

**COMMITTEE BUSINESS**

**New Business:**

1. Approve the 2021 Water Advisory Board Schedule  
The agenda stated the meetings will be held every other Tuesday, but the dates are actually Thursdays. The Board decided to go back to Tuesdays, as that seems to work better for some members. Ms. Clark will adjust the dates to:

Tuesday, January 12, 2021  
Tuesday, March 9, 2021  
Tuesday, May 11, 2021  
Tuesday, July 13, 2021  
Tuesday, September 14, 2021  
Tuesday, November 9, 2021

All were in favor of approving the 2021 Schedule. Ms. Clark will contact Mr. Beck and Mr. Boshell for their vote and submit a letter of recommendation to the City Recorder.

Brief discussion on water rights and how Springville is doing. Cl. Jensen mentioned he would be attending a SUVMWA meeting soon, where they will discuss ULS water Central Utah Water Pipeline. Spanish Fork is using that water now. At some point, Springville will need to use it, as stated in the contract. Springville City has options to lease or sell the water, which is good for the City. Cl. Jensen is confident the City is in good shape when it comes to water supply and water shares, without the ULS water.

2. Current/Future Growth - Impact on Existing Utilities  
Mr. Barker wasn't sure of what Mr. Stapley was going to discuss. It might have been about Spring Creek Tanks. Ms. Clark thought it had to do with the proposed growth west of I-15 and our existing master plans, for sewer and water, may not be sufficient. Mr. Barker mentioned that water infrastructure east of I-15 will still require some upgrades as more development happens. The challenge with development west

of I-15 is the timing of it, specifically near the Transfer Station, at the end of Center Street, north of 400 South.

Mr. Hotchkiss gave some information to the group on a project he and his students have been working on, concerning low head dams and accidents. He showed a video describing the problem and how they are trying to raise public awareness, to avoid more tragic deaths. In Utah, there are more than 500 low head dams. Mr. Hotchkiss is not aware of any in Springville.

Mr. Hatch asked Mr. Barker how the City did with water revenues this summer. Mr. Barker replied that we're in good shape. The new 400 S Well was a life saver.

## **ADJOURNMENT**

Cl. Jensen moved to adjourn. Cl. Andrew seconded. All were in favor.

Meeting adjourned at 7:09 a.m.
