Be Ready Utah Water Storage and Treatment handout:  
<https://www.utah.gov/beready/documents/BRUWaterStorageandTreatment.pdf>  
Store 1 gallon of water per person per day; 2-week supply  
Rotate water storage supplies every 2-3 years  
Never use containers which held chemicals to store drinking water  
Use HDPE plastic #2 solid color plastic containers

Use a drinking water hose to fill containers; no need to re-treat municipal “tap” water; fill to top to create a seal and keep the gaskets from drying out  
Do not store directly on concrete; otherwise microbes can seep into the plastic from the concrete and contaminate your water
