

AMERICAN GILSONITE

2020 Reclamation

Proven Under Pressure®

Outstanding Final Reclamation and Site restoration

In 2020, American Gilsonite Company (AGC) reclaimed over 20% of the company's reclamation obligations on Patented Fee, State and Federal Lands in the State of Utah.

- > 9 full mine sites reclaimed and regraded (14 total locations reclaimed¹)

AGC completed more reclamation in 2020 than had been completed in the previous 20+ years

¹All locations were inspected and authorized for release by DOGM

Environmental Excellence

American Gilsonite Company goes beyond the regulation by taking additional steps to ensure stability, to improve environmental sustainability and to promote successful regrowth of vegetation.

Cap Placement on Bedrock

Straw Added for Retained Moisture

Metal & Debris Separated for Reuse or Recycling

Additional Water and Fertilizer to promote Seed Germination

Employment in Utah

Uintah County has been one of the hardest impacted counties in the State of Utah for unemployment. During a period of significant economic impact to AGC due to market downturns and impacts from COVID-19, AGC was able to keep a workforce employed through reclamation projects.
