Dear Mona City,

Attached is an estimate to replace the water heater at the sewer plant. We have found that the Navien Tankless has a stainless steel heat exchanger and is performing the best over time. Especially in areas with potential corrosive environments, the stainless components are a lot more durable.

We also included an expansion tank and other accessories that should help with longevity.

Let us know if you would like to proceed with replacing the failed water heater and we will fit this into our schedule as soon as possible so you can get the hot water back up and running.

Thank you,

Chet
