

Paradise Town Council

Agenda

July 12, 2021

7:00 p.m.

9035 S. 100 W.

Special Meeting

Council Members Present: Mayor Little, Shannon Rasmussen, Larry Johnson, Jason Winn, Trent Passey- attending via zoom, Alyssa Petersen (recorder)

Community Members Present: Planning and Zoning Chairman Linda Hoopes, and Planning Commission members Jodie Anderson, Devin Thomas, Jeff Nielsen.

1. **Water Report-** Lee Atwood attended the meeting and gave a report on water usage and where we are currently as far as the spring flow is and the water usage. Larry feels that the 6 months would give the Planning Commission time to work on the General Plan and would help conserve and protect the current water supply. Jason would like to know if we are losing any water and where. He would like to evaluate the infrastructure and see what could be leaking or where we may be losing water. He would like to make sure everything is functioning well and efficiently. Shannon thinks this is a good idea because when the irrigation water gets shut off, it will show that the Town is being proactive to protect our water supply. She thinks it will hold more weight to enforce no outside watering. She thinks it will encourage residents to recognize the situation and not water outside, wastewater, etc. Mayor Little thanked Lee for the water report. He would like to have a goal for a moratorium and would like to see what we can accomplish while the moratorium is in place. He would like to see the infrastructure issues addressed as well. He would like to see the few meters in town that are not working fixed and would like to have other infrastructure issues addressed. He would like to think about “beefing up the system” moving forward. Mayor Little reported that there are funds now coming from the Feds to the States to the hard-hit municipalities and are COVID related. They can go towards a variety of infrastructure projects. The mayor also wondered about if everyone’s septic systems are working right and if we should look into waste water. Larry is concerned about fixing things that may not be broken and supports looking at all the above-mentioned concerns on an individual basis. Lee wanted to clarify that air releases are more for quality, but not quantity. He feels that some of the individual issues are quality and some quantity. There was discussion on checking for leaks at individual residences. There was discussion on where the current wells are and where a new well could be dug.

2. **Building Moratorium- Ordinance 9-503-**

Roll Call Vote:

Mayor Little: Yes

Shannon Rasmussen: Yes

Larry Johnson: Yes

Jason Winn: Yes

Trent Passey: Attended virtually- Yes

Ordinance Passes, Vote unanimous.

Meeting adjourns: Shannon made a motion to adjourn, Jason seconded that motion, all in favor. Meeting adjourns 7:56 p.m.
