

Payson City,

This is in regards to the Parris RV pole sign. We would like to have the sign closer to the freeway so the sign can be seen and promote the business much better. The original spot that was picked was from the architect and was always thought it was much too far back and needed to be placed closer to the front of the property near I-15.

Now that the property has begun, I asked the owners and contractor of Roger Knight Construction to meet all on site and go over the placement.

This new spot located closer to I-15 is on the property and not in the way of the future expansion of UDOT.

We are in a better spot in regards to the neighboring properties where we are not back so far that it looks like it's not in the correct location. This new location will make this property look much more like it should naturally be.

We comply with UDOT code staying off their property and also comply with Payson code staying on Parris RV property.

Thanks,

Carston McCullough
