Hello thank you for reading my comment. My name is Brandon Storey 7357 S. 1750 E. I am unable to attend the meeting tonight but feel strongly that something needs to be done with the dirt problem in south weber. I don't really like the term dust because what covers my property is more of a sand pile. I have lived here since 2015. We have noticed the dirt each day since we moved here but it is definitely worse the last 2-3 years. This year is particularly bad but the last 2-3 has been the same. Every day I change my dogs water because it's full of dirt. We vacuum twice a week and blow off the front porch each day. My lawn between water days fluffs dirt when I walk on it and when I mow I have a farmers tan on my legs from the dirt. It is inside my home my cars my trailer shed etc. I have a wife and son with asthma and it cannot be good for their health. I am not wanting to create bad business for the pits as I have used their products over the years but something has to change. Lots of people chalk it up to the poor water year but I assume if I can water my lawn they can use water for dust control. Please represent the citizens of this city and let's do something about this. There are other cities in northern Utah that have reputations for crime or some other issue and when I tell people where I live they say "I hear the dirt that blows there is bad". It's crazy people that don't live in our city know about what's going on. Thank you for your time.

I would highly recommend that South Weber City install their own independent air monitoring network to adequately monitor wind blown air particulates down wind of the facility. This air monitoring network should also monitor particulate concentrations to protect human health and the environment.
