Agenda Item 1

The City Recorder reviewed the phone system upgrades/improvements. In November and December 2020, the city obtained bids from Les Olson Company and Emery Telcom for a new PBX and phone system. The original bids from Les Olson included free phones and a cloud-based PBX that would allow the end user to make modifications when necessary. Therefore, the city entered a contract with Les Olson and Jive.

In February 2021, the city began implementing the new phone system. This required Jive to port the numbers from Emery Telcom into its system. On March 1, 2021, the city was told by a Jive tech that the numbers from Emery Telcom could not be ported over and the city reached out to Les Olson for assistance.

On March 16, 2021 the city, Les Olson, and Emery Telcom met to discuss the options for still moving forward with the Jive PBX System. Emery Telcom representatives expressed concerns over the city obtaining a number out of the area as it could increase the rate the city pays for long distance calls.

In summary, the city recorder noted four options for the council and asked for its recommendations. The city could spoof the JIVE system by obtaining one new number out of the area, the city could obtain all new numbers and have a more reliable connection with JIVE, the city could cancel the JIVE system contract and enter a new contract with Emery Telcom, or the city could cancel the JIVE contract and keep the older system.

Councilmember Perea asked for the cost comparison of changing to a new number should the city reprint all its forms, checks, bills, and signage. This cost had not been determined. Councilmember Perea also asked what is the turnaround for customer service from Emery Telcom? The city recorder explained that in the past it has been anywhere from two or three days to one or two weeks as the current system is not tied to Emery Telcom and therefore not a priority for the company when an issue arises.

Motion to terminate the contract with Les Olson and JIVE and to enter a contract with Emery Telcom for and updated phone system and PBX

Council Reports

Councilmember Perea provided an update on the OHV Trail Project. The project's anticipated costs are much lower than the actual costs. The cement for the project was bid at almost \$20k, and the city was only awarded \$12k. Perea also discussed the AARP Grant she applied for to get funding for Wayfair Signage. The proposed locations for these signs are City Hall, the park, the pond, and the road to Nine-Mile Canyon. This would benefit visitors and residents.

Councilmember Pell noted that he has determined which roads have potholes and other issues that need maintenance. Pell plans to work with the Public Works Director to review these locations and plans to utilize the iWorQ program recently purchased by the city for tracking these areas.

Councilmember Wells stated that the water situation is bleak and asked everyone to pray for water. Wells also provided an estimate of when the irrigation water would arrive.

Mayor Reports:

Mayor Noyes thanked Mike Miller for donating the rock on the west/north end of the City for the "Welcome to Wellington" sign. Marietti Monuments

Adjourn

Motion to move into executive session. 6:42 PM
