The service district sent this over for us to accept. I have it on the agenda for tomorrow night's council meeting. Would you please review it and let me know if there's anything I need to make the council aware of?

Has the District provided this as a suggested ordinance or as a required ordinance? Its intent is good but I would be concerned with its enforcement, if you have a lot of these cross connections. The owners are required to have their systems or equipment inspected on an annual basis (at least annual) and it should be done by someone who is certified. It sounds like it will be costly and that means you could get a lot of push back. There is one thing that bothers me. There is reference to the water purveyor and they have substituted Ferron in most places, but not all. 2.1 should say that Ferron is the purveyor, but does not quite get there. It should be reworked completely.

I think it's a suggested one. I heard a council member had talked about it and then I received this. I'll let the council know of your response and see what they say.
