1. Does the bond cover the cost of repair to Roads for cable installation?

2. Will homeowners be responsible for the cost of connecting their homes to that cable the city installs in the street?

3. What kind of "damage" to property will this affect?

Thanks for your work in this.

Please consider this! We've been hoping
for more options for 10 years that
we've been here.

*This should be decided by vote, not by Committee, if everyone will
be faced for it.*

I am dissatisfied that the people
were not more informed. I think it
should have been on a ballot for a
vote.

5 mbps download speed / 1 mbps too slow!

I DON'T THINK THIS IS A GOOD
IDEA AT ALL. TOO MUCH MONEY
COMMITTED FOR TOO LONG FOR SOMETHING
THAT IS NOT NECESSARY BECAUSE THE
STATUS QUO IS FINE

I don't think people should have to pay for a service that is provided by private business that meets my needs to be forced to pay a monthly subscription that I don't use. I don't want it.

~~Techno~~ Tech + innovation will pave a way.

We're really stuck when our only land-line high speed option is comcast/xfinity. You get great night through for sales, but ~~the~~ support will be 145+ minute wait. They make their money by exploiting monopoly models.

I work from home, great reliable internet is essential.

~~That~~ I really want internet from a great reputable company. I have TXOX/optic 'Fiber' (only thing available ^{in access}). The internet is unreliable, I'm constantly throttled. 25mps or less

I just don't want to swap one crappy internet company for another crappy internet company.

I have friends in Tremonton area that have Utopia / Xmission that sing praises, and pay around \$60/month.

When If you choose to do fiber, please let it be a highly reputable company & provider options. Thanks

I do not want the city going into debt
\$12M to provide internet to residents. Find
a way to do this without bonding & I
might entertain the idea.

It is not right that we charge everyone for the service whether they want it or not. Only people who want it should have to pay for it.

Don't think it's right to let other decide whether I pay for it or not. You need to let us all vote individually.

Comcast is currently our only option for internet. We've tried TXOX & Rise Broadband and they could not provide adequate service. Comcast gets to raise our rates higher every year with no competition and we have no choice but to pay it. In this day and age, internet is as necessary as water or any other infrastructure. We need this!

I am STRONGLY for fiber internet in our city! It's time for more competition and more options. Monopolies are never good for anyone but the companies in charge. Let your citizens have choices. Please please please!

Although we are in a bubble that no one wants to serve on 4100 N 175W - I'd rather put up with what I have now than see this small city go into such huge debt.

long before the band is paid off in 30 yrs, there will be newer, cheaper, better technology. Don't do it please.

We need other options for internet service in P.V. Currently limited to Comcast. Cost has to be competitive with equal or better service. Competition will improve service & costs.

I currently have very limited options. For whatever reason comcast did not run cable down my street when trenches were open during neighborhood development. They wanted \$5000 to run a line and connect me. My only options are Century link (1.5 Mbps service) or wireless. I have had mixed luck with wireless, most of the time service is way too slow to telework or use modern entertainment. Fiber would provide an option that is currently severely lacking to several houses along my street.

This ~~can~~ should be voted by the city.

This is not the cities responsibility to provide internet.

How is the maintenance going to be funded?

Will taxes go up?

I have concerns about the City going into the business of internet services. I don't see that as a basic need the City should be involved in providing.

I would love to have affordable high speed internet. I do not think it is moral to force my neighbors to subsidize my wants. Fiber is an old technology that is soon to be supplanted by other tech. Such as: Starlink, 5g, ~~fiber optics~~ I have many options for internet: Comcast, Starlink, TDX, Optic loop, T-mobile.

Comments Regarding Fiber Optics

There are already lots of internet options available. More are coming with ~~satellite~~ satellite options. I'm not for Netvix texes or charging everyone for a service that is already available. My Comcast service works great.

Comments Regarding Fiber Optics

Name:

James Child

Email:

Please Don't do this. If the city wants to allow a company to invest their own money and get their own customers, that is fine, but forcing me to pay for my neighbor to have high speed internet when I don't need it is wrong.

Yes to fiber

Necessity in today's day and age, w/ work + school.
Neighbor lost a buyer to selling home because we
had poor internet service on 4000 N.
All of PV should have this access.

Thank you for your
service.
