

Storm water issues.

Good evening. My name is Nathan and I have been a resident of CH since 2013. I would like to address the new storm water fee. I live at 6969 S Virginia Hills Dr. Due to poor design and lack of a new road, when there is a storm, all of the runoff ends up in my and my neighbors of Virginia Hills yards and driveways. The road has been resurfaced rather than redone too many times which has created a rainbow shape in the road. The street is relatively flat which has exasperated the issue. In addition, no stormwater drains have been placed on this street, which is a huge issue. There is one at the very end of Virginia hills but this only services a couple houses on the street. I have spoken at length with Public Works. The policy off the city is that the homeowner is to maintain the gutter and pay for it out of their own pocket. Due to a sinkhole being created in my yard, I had around \$4500 of work done in removing the old gutter, pouring a new one and pouring asphalt. This was only about a 75' stretch. The 50/50 program only covers up to \$1000 and there is only a limited amount of funds there.

1. The following are a few proposals: I request that CH pay 100% on a reviewed basis the work of select gutters. I understand that maintaining all gutters is a big ask but it is important to note that adjacent cities pay for this service as to maintain a neighborhood that the city can be proud of.
