SMART ENERGY REBATE PROGRAMS

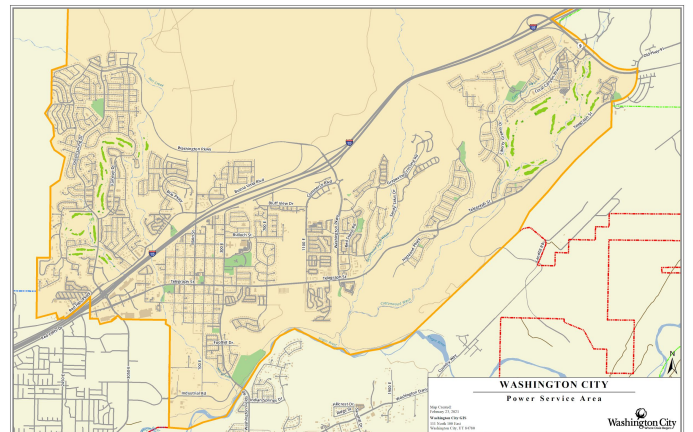

Did you know that Washington City is a participating UAMPS partner? The Utah Associated Municipal Power Systems (UAMPS) is a political subdivision of the State of Utah that provides comprehensive wholesale electric-energy, transmission and other energy services to community owned power systems throughout the Intermountain West.

What does this mean for Washington City Power customers? Residential customers of participating UAMPS partners are eligible to receive cash incentives on energy efficient appliances and lighting fixtures. This means you get cash back when you purchase a qualifying clothes washer, refrigerator, dishwasher, A/C Unit, water heater or lighting fixtures. Plus, you'll save on your energy bill year after year and help the environment!

10 Simple Ways to Save Energy

1. Replace light bulbs with LED bulbs
2. Wash full loads of dishes and clothes
3. Turn down your water heater temperature
4. Use a programmable thermostat
5. Keep your freezer full
6. Turn off lights in rooms when not in use
7. Unplug devices that are not in use
8. Install energy efficient windows
9. Weatherize your home
10. Use a ceiling fan
