This is for consideration by the board of equalization. I apologize that I can not appear in person due being transfered to Denver for the time being with my profession.

I realized a water issue in the beginning of the summer when our bill went from it's normal \$66 to \$180. We thought we solved the problem but then it spiked to \$230. We had 2 Riverton City workers come to the house to try and decipher what was happening. They could not solve it. I had my landscaper company come out and they were able to isolate the "stop & waste" valve and then gallons of water started to appear in the area. This valve had cracked and was spilling water underground. This valve is 5 feet underground and went unnoticed due to its depth. I had it fixed within 12hrs at a cost of \$450. My final bill was \$1286.00. I filed the paperwork for the leak and it was reduced to \$770.

As a side note, the bill currently shows late but simply because Mr. Hawker was unavailable at the time and the forwarding city attorney I chatted with told me not to proceed with any payment until a reconsideration could be made. I don't want the board to think I am not trying to pay, this is why I called when the bill was in it's proper date range.

Any reduction would help our family recoup from what has been an expensive summer for us with the move and water repairs and water bill.

Thanks for your consideration,

Robert Martin
