COMMUNITIES THAT CARE

- Guides communities through a **process** to build a system in our community to **prevent** the most widespread health and behavior problems in our community.
- A **coalition** made up of a wide variety of community members who make the process happen.

HOW IT WORKS

PREVENTION SCIENCE

To prevent a problem before it happens, you need to address the predictors.

SCIENCE OF RISK FACTORS

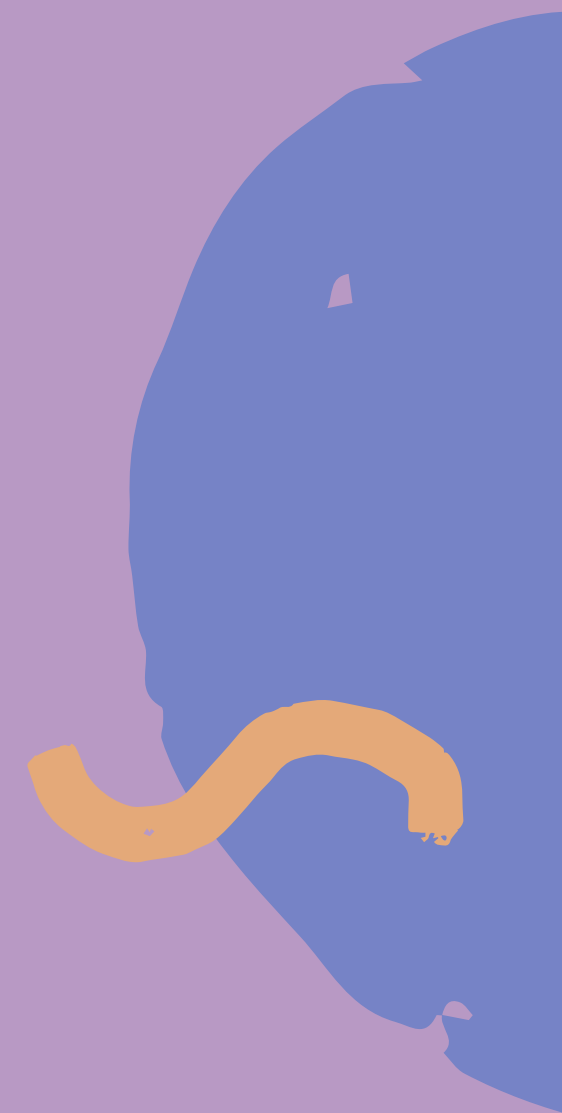

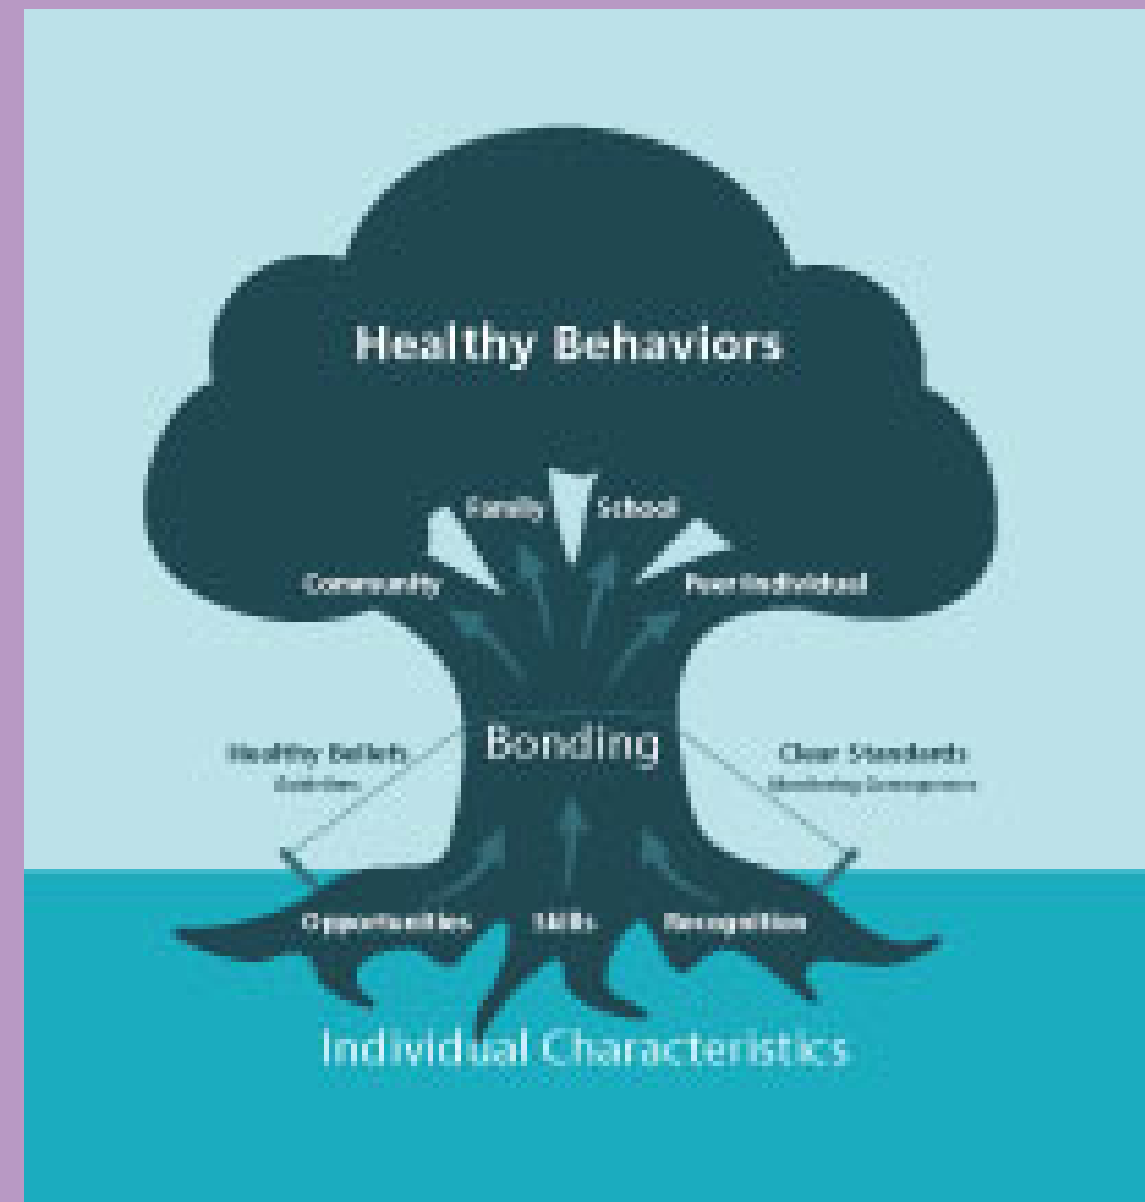

- in every domain of a child's life & across development
- predict multiple problems
- similar across racial groups
- buffered by protective factors
- can be measured

PROTECTIVE FACTORS

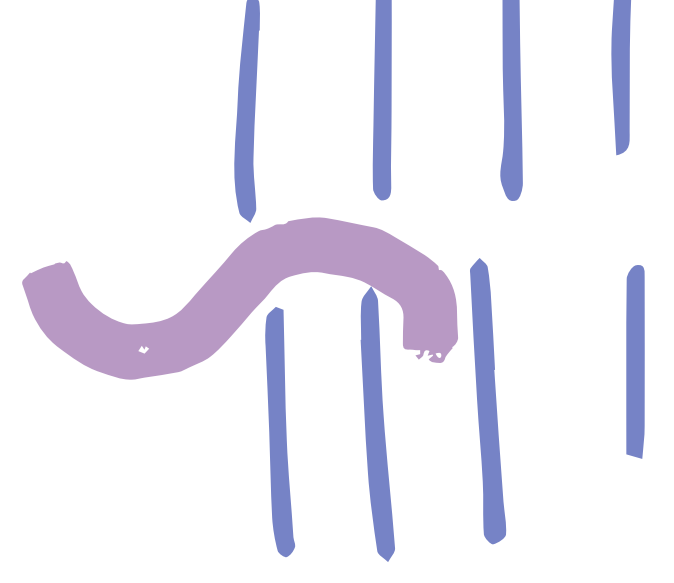

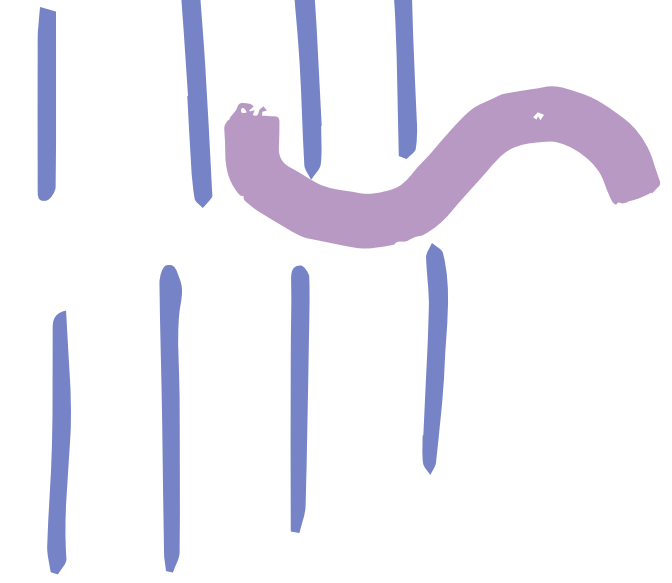

"Never doubt that a small
group of thoughtful,
committed citizens can
change the world; indeed, it's
the only thing that ever has."
