This amount includes \$248.1 million to the Public Education Economic Stabilization Restricted Account, \$131.9 million to the Teacher and Student Success Account, \$108.5 million to the Local Levy Growth Account, and additional amounts to other accounts listed in the bill. It adjusts categorical programs in the Minimum School Program for anticipated student enrollment growth and increases the value of the Weighted Pupil Unit (WPU) by 2.6 percent for inflation to an initial value of \$3,908. The bill transfers another \$565,264,900 in FY 2023 from the General, Education, and Uniform School Funds into various funds and accounts detailed in the bill. Enactment of this Legislation increases the WPU Value Rate portion of the Basic Tax Rate as outlined in statute for the WPU Value increase provided in the bill. The statutory formula indicates that the WPU Value Rate generate an amount based on the prior-year state and local funding mix supporting the Basic School Program, which is an 82/18 split in FY 2022. As a result, each percent increase in the WPU Value results in a property tax impact of \$6.2 million, or a total of \$16.2 million statewide for the 2.6 percent increase in the WPU Value included in the bill. <a href="#">HB0021S01</a>	School and Child Care Center Water Testing Requirements	<a href="#">Rep. Stephen G. Handy</a>	This bill addresses water quality for schools and child care centers. This bill requires certain testing of water for lead at schools and child care centers, addresses funding for testing and certain actions, requires action if lead test results equals or exceeds a certain level, addresses rulemaking authority, addresses records that the division shall post, imposes sunset dates, and makes technical changes.	<a href="#">Senate 2nd Reading</a>				Enactment of this legislation could cost the Department of Environmental Quality (DEQ) \$3,500,000 one-time from previously authorized Federal Funds of the American Rescue Plan Act (ARPA) to issue reimbursements to schools and childcare centers to cover the expenses of testing consumable taps for lead and to provide staff to coordinate sampling and remediation efforts. The Department may also provide reimbursements for the costs of remediating for taps found above the action level for lead. This bill could also cost DEQ up to \$411,500 from previously authorized Federal Funds (non-ARPA) for lead testing in schools and childcare centers. Enactment of this legislation could have a fiscal impact for Local Education Agencies (LEAs) to collect and submit a sample from consumable taps in their facilities to a Certified Laboratory for lead testing. The expense of testing would be paid by the Department of Environmental Quality (DEQ). It is estimated that there are 45,262 consumable taps subject to testing, and 11% of those taps may require action. The average cost for lead remediation is \$281. To the extent that consumable taps are found to be above the action level of 5 parts-per-billion, LEAs could incur expenses of up to \$1,399,000 for remediation actions. Subject to availability of funding from previously authorized Federal grants, these expenses may be reimbursable through DEQ. This figure could be reduced if taps have been tested for lead since January 1st, 2016. Enactment of this legislation could result in a fiscal impact for private schools and childcare centers who would be required to collect and submit a sample from consumable taps in their facilities to a Certified Laboratory. Under this bill, Private Schools and Childcare Centers would not be required to pay for lead testing, however they would be financially responsible for remediation of taps that test above the action level of 5 parts-per-billion and are required
