Items of concern:

1. What will be the source of water for project and the proposed residential units?
2. Proposal to reduce the undisturbed land from 45% to 5%. Mass grading and removal of so much natural landscaping is a detriment to the Town of Hideout and has a negative impact on wildlife.
3. What is demand for hotel space in the immediate area? What is the occupancy of the Blackrock Resort?
4. What is the demand for the amphitheater? Would this space be better left as "natural" open space park?

Thank you.
