Marty Larson
1608 South American Way
Payson, Utah 84651

Dear Chair Larson:

The Strawberry Water Users Association seeks membership and an appointed/elected position to the Board of Directors with the Mt. Nebo Water Agency.

Strawberry Valley Project water first arrived in South Utah County in 1913 and has been a reliable source of water to farmers, ranchers and cities from that date. Today, the Strawberry Water Users Association (SWUA) and the Strawberry Reservoir system serves approximately 4,500 shareholders with irrigation water on approximately 40,000 acres of land. This includes deliveries of irrigation water to the cities of Springville, Mapleton, Spanish Fork, Salem, Payson, Genola and to nine canal companies. Each of these canal companies is represented on the SWUA Board of Directors.

SWUA was incorporated in 1922. We celebrated our centennial milestone just last month. Our mission is to *"develop, preserve, and enhance Strawberry Valley Project water, energy resources and investments for the benefit of our shareholders."*

SWUA respects and supports the Mt. Nebo Water Agency objective to protect and preserve water resources throughout much of South Utah County. SWUA believes this objective and our mission are closely aligned and, together, our common interests will add value to the growing demands in South Utah County.

On behalf of the SWUA Board of Directors, I appreciate your consideration.

Regards,

Sterling Brown
General Manager
