ADMINISTRATIVE BUSINESS:

CALL MEETING TO ORDER

Dr. Dunford called the meeting to order at 8:39 A.M.

Director Steinagel discussed the Supreme Court ruling regarding Roe vs Wade that happened on June 24, 2022; how it relates to DOPL and the birth control standing order. Director Steinagel explained that DOPL has received many calls on the matter, but until all parties involved have reviewed all pertinent information, many answers to those questions are presently unknown.

Director Steinagel clarified that Utah's "trigger law" is a criminal law and not an administrative or civil law; as such, any legal action would be performed by prosecutors and not by DOPL. Director Steinagel clarified the unprofessional conduct provision within the administrative rules.

Dr. Gunning discussed the confusion between emergency contraception and abortion medication. Dr. Gunning expressed that it is important to differentiate the difference between emergency contraceptive and abortion medication to reduce potential harm and misunderstanding. Dr. Gunning articulated that in Utah, pharmacists are permitted to prescribe birth control through the standing order or with a prescription.

Dr. Dunford discussed the concern over misoprostol. Dr. Dunford explained, "Pharmacists frequently see prescriptions for misoprostol for an incomplete abortion or a fetal demise situation in early pregnancy." (miscarriage) Dr. Dunford stated "one of the concerns is we don't want pharmacists rushing to a judgement and refusing a necessary therapeutic drug to a patient who has had an incomplete fetal demise."

Director Steinagel noted that DOPL will take advice from the Board and that from legal standpoint, a licensee will want to consult with their own legal counsel when questions arise. Director Steinagel explained that in order to understand the differences when certain elements occur, both clinicians and attorneys will need to advise one another to ensure proper navigation of the law.

Mr. Davis articulated the difference between Plan B and ulipristal; as well, as how they work differently than misoprostol. Mr. Davis stated he has received many questions from pharmacists on how to handle misoprostol: such as what obligations pharmacists have for verifying use, and what duties will they have for confirming therapeutic use. Mr. Davis expressed concern over pharmacists denying individuals misoprostol because of how a local prosecutor may view it.

Director Steinagel noted that there is a lot of misunderstanding from individuals when it comes to different medications and that the Board will need to use their voices to educate and inform all involved parties.

Dr. Dunford noted that one of the best resources for pharmacists is to read exactly what is written on their package insert that is approved through the FDA. Dr. Dunford noted that the package insert contains information describing the mechanism of action of drugs no matter if they work in a different way.
