

The Town Council of Snowville Town held its regular monthly meeting at the Snowville Town Hall on **Wednesday 13th July 2022.**

Council Present

Mayor Gwen Wilson

John Levenduski, Council Member

Rod McGary, Council Member

Scott O'Hare, Council Member

Tammie Morgan, Clerk

Stacey Hill, Treasurer/Recorder

Others Present

Jed Pugsley, AJ Morgan

Nick Pexton, Mrs. Nick Pexton

Greg Stevens, Pete Shabestari

Jon Gilligan, Rod Arbon

Mike Morgan, Scott Wright

Mayor Gwen Wilson called the meeting to order at 6:00 p.m. She welcomed the council and all others present. Tammie Morgan led us in the pledge of allegiance and Rod McGary offered the opening prayer.

Scott O'Hare made a motion to accept the agenda with the addition of the dog incident, garbage, and travel trailer. John Levenduski 2nd. All council members present voted yes.

John Levenduski made a motion to accept the minutes from the previous. Rod McGary 2nd. All Council members present voted yes.

Deputy Martinez

Deputy Martinez couldn't make the meeting tonight so he emailed the town council the calls for June 2022, Stacey copied them off and handed them to the council. He also sent the number of traffic stops made in June 2022. There were 3 traffic stops in Snowville. With 28 calls that officers responded to.

Beehive

Mayor Wilson asked Beehive what was going on with the project. Greg stated that they were here to give us an update on the project. Nick Pexton with Rocky Mountain West Telecom, spoke first. Nick wanted to address the concerns of the council this project should have been started and done by now. He apologized for not being here last month there was an email sent

but not a reason why they couldn't be at the meeting last month. Nick explained that there was a tie-up with the money of Federal funding. Which grounded the pilot program for the project. He stated that there have been some issues. If the money had been awarded in round three this would have been a different story. He stated that they have had some Administrative issues. Now they are ready to rock and roll with construction. Scott O'Hare asked where was the money, to begin with. Scott also asked if you have the money now. Nick stated that the money was never missing. Greg stated that the funds have been released. Scott stated so you guys have had the money the whole time but it was never released? Scott asked who had the money and Greg stated that Rural Utilities Services had the money. Scott stated that they have had this money the whole time in their account collection interest while we set here with no Fiber Optics. Nick stated that Rural Utilities is a branch of USDA we had to work through some issues with the Fish and Wildlife Services. Scott asked why wasn't started last month. Nick stated that it was because of construction. Nick stated that they would probably start on August 15th, 2022. Scott stated so another month behind. Nick stated that he would like to be on the agenda for next month. Nick stated that he will have some people from the crew come up and talk to the council next month. Scott asked are they still planning on a 60-day turnaround. Nick stated yes. Scott stated that when we start the project we should have been finished with it. Nick stated yes. Scott also stated now you are getting closer to winter time he hopes that the project will be finished in time. Mayor Wilson stated that some people are worried about customer service because there had been so many delays with the project. Greg stated that the good news is that it will not be tied to the government at all. Once the construction is done it will be all Beehive. Greg stated that next month the contractor will be at the town council to update the council. Scott asked Greg what the name of the contractor is. Greg stated Neils Fugal. Mayor Wilson asked will they be putting the tower in or will Beehive. Greg stated Beehive will be putting the tower in. Mayor asked Greg if he had the footing out on site yet. Greg stated no. Greg stated that he was the engineer for the project. Rocky Mountain Power is asking for an easement from Tom Tanner that has a property right across the road from the town's property. Greg stated that it has to have a professional surveyor description of the easement. Greg stated that they are still waiting for the surveyor to come out and survey the property. They are on a schedule and they are coming out to take care of the survey. Greg stated that it wasn't slowing down anything just a snag that they had to get through. Greg stated that is why there wasn't a paper for the Mayor to sign for the easement of the town's property because things weren't in place. The survey had to be completed first, and it had to be properly recorded by the County. Greg stated that he is not too fond of how it is going right now. Greg asked the council if they had a backup surveyor that they have used. He is looking for a professional surveyor. Mayor Wilson asked who you have now. He stated that it was Christian. Scott asked AJ Morgan if he knew of any surveyors that he knew of. AJ stated that he only knew of Johnstons in Tremonton and said that they probably are so booked that it would be hard to have them come out. Scott asked if Nick could talk for a minute. Scott asked Nick so you guys have had the money. Nick stated that CO Bank has the loan or grant money through RUS or USDA. No one has had the money in their account. Beehive had to have a request statement to draw out of that account. Nick stated that they can't collect interest off of this project they have to go through the steps of invoices to complete the project. Nick stated that he will be honest with the council when this project was put together there were different costs

of supplies. Now all of the supplies and labor have gone up. Nick stated that they have lacked in time there is no doubt about that. Beehive is pulling a lot more money out of their own pocket for the town to get this project done. Scott stated that he understands that prices have gone up they have everywhere. But this project should have been done a long time ago. Scott also stated that it shouldn't be pushed on to us because everything was and has been in place. Also ready to go. Mayor Wilson stated I thought you already had the money, Scott stated they couldn't get the money released. Greg stated that they preorder the materials. they have been setting on the materials waiting for the funds to be released. Scott asked where are the materials at. Greg stated that they are stockpiled in Lake Point Utah. Until we can work out an agreement with the Fire Cheif Jed Pugsley. Greg stated that they don't want to store the materials in Snowville until they are ready to go. Greg stated that there would be a risk of vandalism or the risk of loss. Greg stated that they can bring the materials out when they have a place to store the materials for the project. He has been working with Jed Pugsley and Kacey to put a fence around the materials to make sure that there is nothing that will go missing. They have asked Kacey to be on the lookout. Scott asked so if something walks away or vandalized the town or Jed will not be responsible. Greg stated that it was correct. Mayor Wilson asked Greg if they have flyers so we can put in the water bills to let everyone know about what is going on with Beehive. Greg stated that they have put together a flyer for the residents of Snowville with maps of the area that will have fiber optic and other areas that can get wireless off of the tower. Greg stated that he has put together as much information for the residents as he could to help with questions. Greg stated that all the Businesses and some residents will have fiber and some will have wireless. Scott stated that Snowville's limits are very small. Greg asked if we could send the papers out in the water bills, Scott stated that the water bills for this month have gone out and they will have to go in August's bills. Greg changed the due date to September 30th instead of August because of the mix-up with the schedules. Greg stated that they are planning to have a BBQ for the residents to ask questions and have them answered by Beehive. Greg stated that Beehive has television and telephone lines that will be offered to the residents with fiber. Residents will have until September 30th to sign up for Beehive. Greg handed out some i information about Beehive. Tammie Morgan asked Greg for the people that live in the yellow circle, do they have to sign up for the services? Greg stated that they still need to send in their service agreement. Tammie also asked if they could have customers in Idaho because it will cover her house and others in Idaho. Gregg stated that it will not stop right there she should be able to get wireless. Mayor asked if the price was \$99.00 dollars if it going to be \$150.00. Mayor stated that we will catch Hell for that from the residents. Greg stated that it starts at \$99.00 and there are taxes and fees, he doesn't think there is \$50.00 of taxes and fees. Scott stated that if you look at your cell phone bill you can see how cheap they are going to be. Scott stated that the \$99.00 a month package is the top package for 1 gig. Greg stated that 1 gig is a lot for one household. Greg stated that they will be having a new package soon the prices are not going up they will have more options. But that equipment will not be ready until the end of this year. Scott asked will you have to come back out here to upgrade everything Greg stated No everything is done by electronic. Scott asked if the residents can go online or call on the phone to get their service agreement ready. Greg stated Yes. Greg stated that the agreement will be a 12-month agreement. Scott stated that the only reason we are signing a 12-month agreement now is to get the installation for \$300.00. Nick stated that the residents

should just sign up even if they are not going to have the services for 1 or 2 months. It just saves everyone money then the installers will not have to come back out and have the services installed it will just save everyone money in the long run. Scott stated that Beehive is going to find out that a lot of residents in the town went with another company because Beehive didn't have this project in place. Scott asked will Beehive still honor this same pricing because so of the residents are still under a contract with the other company. Nick stated that they have talked about this same thing and if the residents will let them come and install the lines to their home then all they would have to do is place the other equipment when they are ready to have Beehive fibers. Rod McGary asked Greg if there is a map with all of the diagrams of where the fiber is going to be laid. Greg stated yes that there was and they will have it at the pre-construction meeting. Scott asked Greg and Nick if Beehive still planning on coming out to Snowville to have a BQQ for the residents and to answer questions that they might have. Greg stated yes. Scott asked if they have a date for that. Greg stated that it will be before construction starts probably before the 15th of August. The council thanked Nick and Greg for their information.

Black Pine Mine

Pete Shabestari and Jon Gilligan from Liberty Gold presented a sideshow for the council. Pete stated that he should have brought a protector to shine on the wall. But his laptop will do. Mayor asked Pete to introduce himself to the council. Pete introduced himself as a geologist for Liberty Gold. He introduces Jon Gilligan as their Chief Operating Officer for Liberty Gold, they are here to tell the council about the Black Pine Mine Project. Pete states that he was here about a year ago and sees some familiar faces. The new Mayor reached out and wanted some new updated information. Pete asked if everyone was familiar with where Black Pine Mine is. The council said yes. Pete stated that the mine was just over the Idaho border, with Snowville being the nearest community. Pete stated that Liberty Gold likes to have everyone updated on what is going on with the mine and the activity going on out there. Pete states Liberty Gold is a Toronto stock exchange company. Then the power went off. They find and develop Gold mines in the Western States, they are a very small group of mostly geologists and engineers. They develop large low-risk Oxide gold deposits. How do they do this first they have to find them. They look for very simple projects. They like things that they know are easy to do and easy to get into production. Where do they look for Gold, in Gold Mines Black Pine Mines was a fast-producing mine from 1992-1997. Liberty Gold liked the mine and has gone in and have started drilling. Pete stated that they have had 4 years of drilling now. Pete stated when they drilled they found gold. They did a lot of studies environmental one they like to engage with the local community to help them update on the project. History of Black Pine Mine it is a small heap leach mine that has mined 600 thousand ounces of gold. Pete states that Liberty Gold bought Black Pine because of the location in mining-friendly Idaho, large property of (51km), excellent projects access, power to the property boundary, no timber values, no water in the mineralized area, no fish-bearing streams, groundwater in the basin, previously mined and

reclaimed. Pete talked about how they develop the gold, they drill it, blast it, dig it, put it on plastic on a leech field, and have cyanide to dissolve the gold out of the rock, the water comes off of the sheet of plastic and is collected in a pond where the gold is pumped into a recovery plant. Pete stated that the cyanide is recycled and put back into the system again. It is a fairly simple process. Black Pine Mine today is accessible from I-84 and county roads. there is the power to the bowery and a well on site. There is no groundwater in the mineralized area and they like that. Pete stated that they have done a lot of work with permits on the BLM and with the Forest Service. They have drilled about one thousand feet now, with 600 hundred holes. They are going to spend about 12 million on direct drill costs. Jon stated that the furthest hole that they have drilled is 18 hundred feet. They have done a lot of drilling. They are doing studies on Sage Grouse now. They have purchased private land and have water agreements in place. They have an agreement with Oneida County to manage the roads that are out there. They show that they have about 2.2 million ounces of Gold. With most larger still to find. They will start to build the Mine with a record of solutions. Pete stated that the mine will probably be here for 25 years. What does that mean for Snowville? A lot of people. The mine will have local investments in the economy. The mine is looking for partnerships, they want to be a good neighbor. The benefits of the mine there will be located and indirect employment. It could mean 200 jobs. With a large increase in the local tax base. Mining is a temporary use of the land. This area was mined once, then reclaimed, and then opened to the public. It will be mined again then reclaimed, then opened to the public again. This is a temporary mine. It is public land. Rod McGary asked if you will be able to feel the blasts from the mine in Snowville. Pete stated that the mine is 20 or 30 miles away from Snowville and you will not feel a thing. Pete stated that they drill holes 20 feet deep and 20 feet apart for each other. When they blast they want all of the energy to stay in the ground. Mayor asked what kind of partnerships are you looking for. Pete stated that they would like to help support our schools. Any other public stuff like the EMTS it will be open for decision. They have donated money to Raft River High School up in Malta. John Levenduski asked when do you start hiring? Pete stated about 3 to 5 years. Jon stated that we will and can't develop a mine without the town's support. The mine would love to have a BBQ like Beehive to tell the town's people to what is going on at the mine and update them. Jon stated that there is a free and informed opinion, you have the right to like the mine or not like the mine. Pete stated that during the permitting process the BLM and Forest Service will reach out to the town and get their opinion on the mine if the town wants it or not. Mike Morgan asked do you have on a job EMT? Pete stated that they will rely on the local EMS. Jon stated that they will have to comply with MSHA regarding how many safety people they will have on-site. Scott asked if they have the training that we could use also for or firefighters and EMS people here in Snowville. Jon stated that would be a great idea. Anything on safety is a no-brainer. Mayor Wilson asked about how many employees will the mine need. Jon stated about 300 employees. Possibly 2,000 jobs will be created from the mine. Some of the jobs will come on stream about 6 months before the mine will be ready. Jon stated that it depends on the protest of the mine. Jon stated that the mine should open in about 2026. Mayor Wilson asked why would there be a protest. Someone stated Tree Huggers. Jon stated that there will be protests against the mine. Pete stated that is why they picked, Black Pine because there is no water and not a lot of wildlife. Pete stated that mining is the cornerstone of this country. Because we don't want to rely on foreign minerals. Scott asked if you have had

any protestors and Jon stated that they have. Scott asked if they had people on the land protesting. Jon stated that they haven't yet. Only by letters. Mayor Wilson stated that they should come back once a year and give the town council an update on the mine and its progress. Stacey Hill asked Pete if they were still doing tours for the public. Pete stated that they would still do that. Mayor Wilson stated that it would be nice for the whole town council to go out and see the mine. Pete and Jon stated that it would be a great idea. Jon stated that the mine will provide the children in the community to stay in the community to work at the mine. The mine will have a 20-year life for the future generation. Also, the mine can bring communities together. Steven Thomas stated that he was glad that there were going to be here for future generations. Scott O'Hare also was glad. Pete stated that in the fall he will have the whole town council come out and take them for a tour of the mine. Everyone thought that was a great idea. Pete stated that he will be in contact with the Mayor and the Council. Pete and Jon handed out business cards and a booklet to the town council. Jon stated that they have a smaller mine in St. George, Goldstrike. The council thanked Pete and Jon for coming.

Marianne Reiner

Marianne and Eric were unable to make the meeting this month. Marianne sent an email. It stated Traffic Beacon An updated order form was emitted to UDOT for state furnished materials. The contractor is getting an update from his electrical supplier and will provide that soon. (the last update in June was that the control box would be shipped in early August.) The contractor is continuing to receive other construction materials for the project. Bridge - The town can apply for CDBG funds in Fall 2022 for the bridge. The application earlier this year for CDBG funds had some issues with public participation documentation wording, however, Brain Carver fo BRAG would like the town to apply again this fall for funds. Per (USDA) Colette (USDA loan Specialist) sent an email on 7/12/2022 requesting an update. I have a few questions to ask her before responding. The PER is being worked on, and we should receive information on the ozone water treatment from Kyle Sorensen, soon to complete that. We are waiting for on ozone pricing and information for the PER. I spoke with Jed Pugsley about getting some needed information for fire suppression and I also contacted AJ Morgan. Test Well- A test well would most likely come after completion of the PER if a test well is pursued by the town. Drilling a test well may new to be looked at more closely, if the town wants to do that. Funding for water treatment and or a test well could come through the Divison of Drinking Water State Revolving Fund and might compete with each other. The PER is formulated by the USDA to help the town make decisions concerning alternatives, of which drilling a new well is included. A copy of this email was handed out to all of the council members present.

Commercial Business License

Mayor Wilson asked Stacey to call Garland and asked them what they charged for a salvage yard. The lady at the office told Stacey that from a Home Business they charged \$25.00 and for Commerical, they charged \$40.00. Mayor Wilson thought that it would be more and so did Scott O'Hare. Mayor Wilson stated that he needs to have a fence up, it is in our ordinances. Mayor Wilson stated that she thinks that a fence should go up first before a permit is given. Stacey asked Tammie about making a motion tonight, Tammie stated that she can discuss it tonight but where there wasn't an amount on the agenda the council will have to have it on the agenda for next month. Mayor Wilson asked Tammie how much do we charge the business in town for a license, Tammie stated that business licensing are not expensive, and Scott asked how much do some business pay for the year. Tammie stated that it depends on some paying \$55.00, and some paying \$60.00. The Flying J and Sinclair pay more because of they sell Beer and cigarettes. Scott stated that we should charge him \$55.00 because it is a business. Stacey stated that she will put it on the agenda next month.

Water

Mayor Wilson asked about the Water Source Protection Plan. Tammie stated that she had sent an email to Rural Water about this and will have something for next month. Tammie also stated that Rural Water is supposed to help with that so we don't have to pay the Engineer. That is how did that last one for the existing well. Mayor Wilson asked about the new software that we need for the water bills and to hook to our new website for water payments. Mayor Wilson asked Tammie to give the council some history on the old software. Tammie stated that we have been using the same billing software since the town took over the water in 2014. Tammie read what Ampstum sent us in an email. The current version of Uswim was written in Microsoft in the late 1990's they will continue to support the software as long as they can but don't know when the software will be useable. Tammie stated that everything they do windows update it messes up the water bills. The computer will not communicate right and it is just a mess. Tammie stated that we can't use it for our website to have the customer make their payments. If we do upgrade to their new software it will be much easier for us and the customers. They will be able to see their bill and pay their bill, we will be able to send out text messages about the water if there is a problem with the water. With the old system, you will not be able to do that. Mayor Wilson asked so why haven't we upgraded the software? Tammie stated that we really didn't need to, everything has worked fine. Tammie stated that this last year we have noticed some glitches in the program. Tammie stated that they will do 4 days of training to get us all transferred over to the new system. It is a web-based system so we will be able to access it anywhere there is the internet. Stacey can look it up at home she doesn't need to be at the town hall to look up stuff. Mayor Wilson asked if we have support with it. Tammie stated that we do and if there is an update it will not cost us anything to receive that update. Tammie stated that every year we pay them \$1,000 dollars for their support. Scott asked if we buy this new system will it come with the support or will we have to pay them \$1,000 every year? Tammie stated that we will have to look it into that and ask them that question. Tammie stated

that last month AJ replace some meters and they didn't read and we don't know why. Tammie stated that when she was with AJ reading the meters that the computer read all of the meters he didn't have to get out of the truck and find the meters and read them by hand it was super easy. Then when we did the bill part, they didn't work so something is not working right. They would not transfer over to the billing side. So Stacey called Ampstum and they said that Windows had updated their system and it messed everything up. The billing would be all online. When we do statements we have to do them here at the office on this computer. We just have a program on the desktop here at the office. Scott asked when AJ goes out to read meters it will automatically download to the computer and then we can do the water bills. The lady that talked to Stacey said that you could access it anywhere with the web-based. Mayor Wilson asked so how much is the program. Tammie stated \$12,125.00. They want a down payment of \$3125.00. to get things started. Tammie stated that they will train up to run the new program that is all included in the pricing. Mayor Wilson asked and it will interact with the website. Tammie and Stacey stated that it would. We use Ampstum now and that is what we will still go through is them. It is an upgraded version of the software that we have now. Tammie stated that we haven't upgraded since 2014 when we bought the water company. Mayor Wilson asked do we have \$12,000.00 for the new upgrade. Tammie stated that we do it is in the Division of Drinking Water Account. We make a payment of \$19,000.00, every year and we have to have at least one payment set aside for next year, and we have two payments set aside. Tammie stated that we can use that to purchase the billing software. Tammie stated that it is a no-brainer there is less room for error. Tammie stated when those meters didn't read we had to go in and manually put the numbers in. On AJ's side, the report shows that they read but on our side, they didn't. Scott stated that the new software will not just benefit Stacey and Tammie it will benefit AJ too when he reads the meters. Tammie stated that it will also benefit the whole town because you will be able to go online and look and pay your water bill. Stacey stated that if we did buy this software that when there were new updates that it would update and the town wouldn't have to pay more for the new updates. Scott asked what was the life expectancy for the program. Tammie and Stacey stated that they didn't know how long it would work, but hoping for a long time. Scott stated that he liked it and it will benefit the town. Mayor Wilson asked can we vote on it? Tammie stated yes we did put the amount on the agenda. Mayor Wilson stated that she trust us with the information given to update the water billing. AJ talked to Core and Main there is another opinion the meters will be downloaded to a satellite and AJ will not have to go read the meters up and down the road with the laptop and the antenna. AJ is looking into that now too. Mayor asked the council if they had any more questions about the new water software.

Scott O'Hare made the motion to purchase the new water billing software for the town for the price of \$12,125.00. John Levenduski 2nd. All Council Members present voted Yes.

4th of July

Mayor Wilson personally wanted to thank everyone who has helped in any way with the 4th of July this year. She was so sick and couldn't make it. Mayor stated that everyone did a great job.

She saw nice compliments on her husband's Facebook, Mayor Wilson asked if the decorations on the fence need to come down and Scott said that they do. Mayor said that she would take care of that. Scott stated that the decorations are really old and probably should be put in the trash. Scott stated that there were some new decorations up at the Bowery they are new this year. Scott and Stacey were talking about some new decorations like the ones that OSI has on their fence. Mayor Wilson said the bigger ones are draped and look nice. Scott stated that if we could get bigger ones they would look nicer. Steven Thomas stated that the decorations are called Bunting flags. Scott stated that we also need a new cooker the other one has its last 4th of July party. Scott stated that it was a Rival roaster it needs to be replaced before next year. Stacey stated that maybe Scott could order the roaster with his card. Rod McGary stated that we have a donation from Raft River they donated \$40.00. Rod told them that they didn't have to give us any money but they insisted. Scott stated that he handed the money over to Tammie and Stacey and they will take care of it and put it in the donation for the 4th of July. Mayor Wilson stated that was very nice of them to do that. Scott stated that we need to get more volunteers for the 4th of July. Rod stated that we had more people having this year than last year, Scott said that they found a new way of serving the food that went quicker. They put Pork on one side and Beef on the other side and it went a lot faster. The clean-up was faster also. they started at 6:00 p.m and they had the Bowery shut and locked at about 7:30 p.m. Scott stated that they didn't have a lot of food left over either so it worked out great. Stacey asked Scott if he had a receipt from Lower's, Scott stated that they would email him one and he would give it to Stacey.

Town Website

Mayor Wilson talked to Jean today and asked her if she would change the due date for our account, to the 15th of each month because we don't meet as a council on the first of each month. Mayor also stated that you can go online and get a building permit and look at the ordinances. On the website when you check on ordinances it will come up with 11 titles, she has broken them down so it is easier to find what you are looking for. Mayor stated that you can make a reservation for the Bowery and the Town Hall. Rod asked if the ordinances of the website were watermarked. Mayor stated that they are in PDF. Rod asked if they are marked as living documents. He doesn't want someone to go in there and change the town's ordinances. Rod stated that it needs to say for reference only on each page. Tammie stated that she will look at the ordinances and change them to say reference only on the page. Rod also stated that if you wanted to say that the official documents are at the town hall if you want to look at them.

Council Position

Mayor stated that she has received a letter of resignation from Garet Wirick. Mayor asked Mike Morgan what happens now. Rod McGary asked do they have to be Snowville Town residents. Scott state that they do, and you have to live in the city limits and have to live here for a year. Rod McGary asked if there were any other requirements. Tammie stated that we send their information to the County and they do a background check on that person. Rod asked what kind of background check. If they have a criminal background. Mayor stated that they can't have a felony on their background. Stacey asked does that have to be posted? Scott says no. Mike Morgan stated that the Mayor and town council will point someone for the position. Scott stated that each person on the council can think about who they would like to point to the seat and come to the next town council with the name of that person they would like to take Garet's seat. The council will discuss it next town council.

Cemetery Garbages

Mayor Wilson told Scott Wright that she went up to the Cemetery on Friday and it looked so good. Mayor Wilson stated that she did the Cemetery for Memorial Day and she work her butt off, it looked really good. John Levenduski stated that he has went up there and it has look really good. Mayor Wilson told Scott Wright that the graves looked really nice they had been weed eaten around and looked really good. Mayor Wilson asked the garbage guy to go up to the Cemetery and get the garbage that is there, and he said sure that he would. Scott asked is he going up there every week. He told Mayor that he would every time. Stacey stated that the garbage never went up there. Scott Page took the garbage from the Cemetery to the Landfill. Scott stated that the Flag pole up to the Cemetery needs to be replaced. Stacey said that the lady in Salt Lake at Colonial Flags gave her a price of \$5,000.00. Scott has been looking for a flag pole a 25-foot pole for \$286.00. The pole can telescope or hook together and there could be two flags on it. Scott stated that they would have to put the new flag pole in the ground. The flag pole at the Town Hall needs to be replaced also. Scott stated that he needs some help to fix the flag pole at the Town Hall, the flag is all tangled up. Scott asked Rocky Mountain Power guys to see if they could use their telescope to fix the flag and they said that they couldn't do it. Mayor Wilson said that we should look into that. Scott said that he could check into it also and maybe buy it for the Town and the Cemetery. Mike Morgan asked you can't fix the pol that is up to the Cemetery? Scott said that the box is broken and that the cord is not on the inside of the pole half is on the outside and half is on the inside. Stacey stated that there are lights along the fence that is on, can they be turned off? It is costing the town money to have them on. Scott Wright said that he will see what he could do. Mike Morgan stated that there is a light switch and is up there to turn them off.

New Fence for the Park

Mayor Wilson stated that when Simon put his new fence in that he asked the town if they wanted to fence around the park. The Town told Simon that they didn't want a fence. Tammie stated that people like that old fence. Mayor Wilson and Scott both said that the fence was a hazard. The pole is broken and needs to be replaced. Mike Morgan stated that 20 years ago when he was Mayor that he wanted to replace that fence but no one would let him. Because it was an antique it had been there for 100 years, and no one wanted it replaced. Scott stated how about we replace the old fence, and put the old fence around the bell? Scott stated that maybe we could have someone come in and fix the old fence and make it look like new again. Mayor stated that she talked to Simon from OSI and asked him if the offer still stands that Mayor would like to have a new fence for the park. She will find out in a couple of days if she will or not. Mike Morgan asked what like of fence are you going to have. Mayor stated the same fence as OSI's. Scott suggested that the fence that runs east and west by Mollies we have cement barriers along the fence so the trucks will not hit the new fence. Mayor Wilson is waiting to hear back from Simon.

Stripping the Park and Town Hall Parking Lots

Mayor Wilson asked so when you are talking about the parking about the town hall are you talking about around the flower beds? Scott suggested having 6 cars park on each side. Behind the town hall, we should put no parking on the concrete, in that area. Mayor Wilson stated that John would like a fence around the trash cans. Scott suggested just out front. At the entrance, you will have to have two handicapped parking places. Scott asked what the statement pad at the park was. AJ stated that it was the old fire station that burned down. Scott said that he will get three bids.

Old and New Business

Mayor asked if this was where we talked about the dog? Scott said yes. Scott sent an email to Scott Wright the dog catcher that showed a dog attacking some goats and the dog was not licensed by the town. Scott stated that the dog lived within city limits. There was a police report filed. The officer went and talked to both parties involved. Scott wanted Scott Wright to go and investigate how the dog got out because it was within city limits. Why was the dog not registered with the town? Who does it belong to? Scott stated that he thinks it belongs to Keith White. Keith leaves in the trailer that is parked in front of the Vit's house. Which is also illegal, it is not supposed to be there. Mayor Wilson asked the council do they wanted to give violations to the trailers that are being lived in Snowville. Scott Wright stated that he might have a sheriff go with him to talk to Keith. Scott Wright stated that if he has a sheriff he might have a better chance of getting the answers that the council wants. Scott agreed. Scott Wright

stated that he recognizes the dog. Mayor Wilson asked how many dogs are over there. Scott Wright stated that he knows of two. Stacey stated that Lloyd Vit's dogs are licensed but he has not brought any rabies shot records. I don't have any of Frank Vit's dogs registered. Mayor Wilson asked if the dog that did this is going to be gone out of town. Scott O'Hare stated he talked to the people on the corner about their dogs, they have another litter of puppies and they were running in the storm drain that runs between the park and the road, Scott O'Hare went over there and give them a warning. He explained to them the ordinances of the town and told them if the animal control officer picks them up what would happen to them? One dog that goes to Brigham will cost you \$300 or \$400 to get back. Scott O'Hare told them that this was their warning the next time the dogs will be impounded. Stacey stated that they have paid their fees for their dogs. Scott O'Hare talked to Will Thomas about his turkeys they were all on the road the other day. Stacey stated the turkeys are coming up to her parent's house and they are not going to make it back. Scott also said that Webb's goat was running down the road also. Mayor Wilson stated that the town is going to court on July 19th for the two violations that have been given out. Scott stated that he will not be able to attend that. Mayor stated that it is about the three trailers. The two are at Delbert's and the other one on 600 North Stone Road. The court starts at 2:00 p.m. She wants to know how this process works and what to expect. Mayor Wilson stated that she hopes they don't ask her how long the trailers have been there because she doesn't know. AJ stated that it has been like that ever since the water system has be put in because he opt out to have a water line to his trailer. Scott O'Hare stated that there is another trailer at Buckingham's property. Scott O'Hare wanted to know when that trailer on Buckingham's burnt up. Scott stated so at least three years it has been gone. They had a fire it burnt up and they clean it up and they have had a vacant lot for three years. So they are not grandfathered in anymore. Mayor stated that she will see what happens on July 19th and if it works the town will do some more. Mayor Wilson stated that we need to be enforcing the ordinances. Mayor asked Mike if he had something. He asked Stacey if she mailed the check for the down payment for the new ambulance. Stacey said that she had not because we had to send it after the 1st of July. We also need an invoice. Mike Morgan stated that he is now retiring as EMS President and that Dave Smith will be the new EMS President. Mayor Wilson asked if we got a new ambulance. Scott said that it is on its way. The new ambulance will be about \$230 thousand dollars. We will be sending a check for \$100,000.00 this week. Mayor Wilson asked what is going to happen with the old ambulance. Mike said that they might take it on trade, but they usually don't give you anything for it. Mike stated that with the mine going in we might want to keep both of them to be on the safe side. Scott agreed. Tammie could not print out the paper that needs to be signed because the power was out, so we will have everyone sign it next time.

John Levenduski made the motion to pay the bill Scott O'Hare 2nd. All council members present voted Yes.

Scott O'Hare made a motion to Adjourn. John Levenduski 2nd. All that were present voted Yes.
