VII. STAFF REPORTING

Clerk Tresa Taylor provided the town council with a spreadsheet reflecting monthly water data. Tresa explained the maintenance department records readings from the town's water system totalizer and at the end of each month, she compares the amount of water distributed through the totalizer to the amount of water billed from water meter readings. In the month of August 2022, the totalizer readings total 9,542,200 gallons of water delivered, and the total gallons of water billed from water meter readings was 7,731,384 gallons, a difference of 1,810,816 gallons. The average monthly difference for the prior

seven months was 258,457 gallons. There was some discussion about the larger difference coming from leaks in the distribution system, a faulty totalizer, etc. Maintenance employee Joe Stevens noted he has surveyed the town looking for signs of water leaks and found none.

Mayor Brian Florang asked the maintenance department to continue recording the daily totalizer reading and to add a column to compute daily gallons delivered so large changes may be noticed sooner.
