•March 2022

Next Level Going Up

- North Pointe is not abiding by their permit
- They continue to increase elevations
- Town Council has no interest in requiring a reduction in elevations, according to Mayor Gurney

- Allowing 30-60 days to work on a new permit without requiring current work to stop will allow them to be another tier up by the time Fairfield takes action

The Town talks about having nice development and spends a lot of time writing ordinances

If ordinances are not enforced, why write them?
