

School-Based Mental Health Screening Guidebook: Implementation Plan

This document serves as an outline for Local Education Agencies (LEAs) to fill in their implementation plan for school-based mental health screening.

Outline your plan in preparation of roll out:

- ▶ Start small, as a pilot
 - Such as: one grade level in one school at a time
- ▶ Consider rolling out your plan in phases, gradually scaling up as your resources and capacity allow
- ▶ Include the WHO, WHAT, WHEN, WHERE, WHY
- ▶ Consider forming a stakeholder group to inform your decision making:
 - Parents, students, teachers, administrators, mental health professionals in the school and/or the community.
- ▶ Think through your community partnerships to support this work and invite them into this process. Remember, you don't have to do this alone!

Questions to answer as part of your plan:

What tool(s) are you going to use? [USB E Approved Tools](#)

What conditions are you going to screen for? [USB E Approved Conditions](#)

Who is going to administer and score the screening tool(s)?

*Same day review of results is necessary to ensure safety for those who indicate a high risk.
Administering and scoring can be done by different people or the same people.*

What is your plan for triaging?

What services will be provided in the school?

What community partnerships do you have in place for referrals?

How will parent consent be obtained?

How will you advertise screening to parents?

How will results be shared with students and parents?

Who will collect the required data?

School-Based Mental Health Screening Guidebook:

Parent Information

The purpose of this document is to be a sample flier for LEAs to provide to parents about screenings.

What is mental health screening?

Screening is a process for evaluating the possible presence of a particular problem. Mental health screening may only happen after the students' parents opt into a mental health screening program or event, giving active consent.

Screening is not an assessment or a diagnosis.

What is consent?

Parental consent must be obtained within 8 weeks prior to administering the mental health screener. A separate consent form is required for each screening and cannot be combined with other consent forms. Parental consent must be obtained regardless of the age of the student.

What's the process?

(This process should summarize your implementation plan.)

Are you diagnosing my child?

No. Screening is the process by which the presence of a particular problem is identified. Further assessment would need to be completed in order for a diagnosis to be provided.

Will I receive the results of my child's screening?

Yes, schools are required to provide the results of the screening if a potential mental health condition is indicated. Results and resources will be provided to the student and parent including any services that can be provided by the school mental health provider or by a partnering entity.

What do the results of the screening mean?

The results may indicate the possible presence of a concern and will help you to determine if your student may benefit from a full assessment.

Do I need to pay for this?

Screening is free for students.

Other questions?

School-Based Mental Health Screening Guidebook:

Methods of Screening

The purpose of this document is to help LEAs determine the method of screening that best fits their needs and resources.

1. **Grade level/Classroom:** Announced, advertised, offered to a smaller selection of students based on other data such as school discipline data, SHARP data, administrator/teacher buy in, parent buy in, etc.

A. Considerations

- ▶ This will require time taken out of the school day (BUT NOT ALOT!)
- ▶ Screening could take place on multiple days as needed or on one day.
 - If all in one day, where will students go whose parents didn't give consent?
- ▶ Consent will have to be received prior to the date of the screening.
- ▶ Teachers may need to administer the survey and SBMH professional reviews results and responds
 - Reviewing results needs to happen same day to ensure students needs are triaged and addressed immediately
 - Note: students at imminent risk of harming themselves or others should receive immediate follow-up within 24 hours
- ▶ Parents will need to be contacted separately regarding the results of the screening

2. **Screening events:** announced, advertised, offered to the entire student population (at the district/LEA level, school level, multiple schools at once, etc). Held on specific dates and times throughout the school year. Parents may sign up to attend or just show up. Parents accompany the child so consent can be signed at the event.

B. Considerations:

- ▶ Could result in data being skewed. It's possible that certain populations may not engage for a variety of reasons
 - Language barriers
 - Unsure of the process

- Misperceptions of what a screening is and its purpose
- ▶ Parents and their students can complete the screener virtually and then come to the school to review/discuss their results
 - If they don't show up, who will follow up with them about their results?
- ▶ Parents and their students can come to the event, complete the screener, then review their results with a professional
- ▶ Event must be staffed by appropriate personnel which could be an added cost (stipends, additional contracted time, etc)
 - Grant funding is available to support these costs.

School-Based Mental Health Screening Guidebook:

Talking Points for Boards

The purpose of this document is for LEAs to have talking points to present to their Board in regards to screening.

Screening is a process for evaluating the possible presence of a particular problem. The intent of mental health screening is to determine the possible presence of a mental health concern and to determine if the student may benefit from a full assessment. Mental health screening may only happen after the students' parents opt into a mental health screening program or event, giving active consent.

Screening is not an assessment or a diagnosis.

Benefits of screening

- ▶ Support a Multi-tiered System of Supports (MTSS)
- ▶ Inform Prevention and Early Intervention Strategies
- ▶ Identify concerns specific to certain grades or classrooms
- ▶ Identify students with highest well-being
- ▶ Identify students at risk for a mental illness or harm to self or others
- ▶ Make economically sound decisions
- ▶ Improve Access to Mental Health Supports

See the [School Mental Health Quality Guide: Screening](#) for more details

Costs of screening

Grant funding is available to support screening implementation and for “qualifying parents”.

- Most screening tools are available for free, but some require purchasing.
- Stipends for school staff to support screening events may be required if offered outside contract time
- Additional funds for contracted services may be required

Liability of conducting screening

[53F-2-522](#)

“A school employee trained in accordance with rules made by the state board under [Subsection \(3\)\(a\)\(iii\)](#), who administers an approved mental health screening in accordance with this section in good faith, is not liable in a civil action for an act taken or not taken under this section.”

Connecting it to Child Find

- ▶ Mental health screenings are one way to identify students with a possible presence of a disability, which is our responsibility. It supports our Child Find efforts but isn't the only way.
- ▶ In accordance with the requirements of Part B of the IDEA and the USBE Special Education Rules, each LEA implementing a mental health screener must have policies and procedures in place to ensure that any student suspected of having a disability, and who may need special education and related services, is identified, located, and evaluated consistent with the LEA's Child Find system.
