To: Emigration Canyon Metro Township

You have requested guidance from me as to your historical environmental conditions as they may impact your legislative bodies' evaluation of fireworks restrictions this season. As the Emigration Canyon Metro Township is located entirely within a wildland interface area or the type of area described in Utah Code §15A-5-202.5(1)(b)(1), and in or adjacent to US Forest Service lands, both historical and expected conditions present extreme hazardous fire potential during this fireworks season. The entire area of the Emigration Canyon Metro Township has experienced these extremely hazardous environmental conditions in two of the last five years (in fact every year of the past five years). I fully expect such conditions may continue throughout the fireworks season this year.

Given the history, factors, and conditions, I have determined, as the fire code official, that hazardous environmental conditions historically and currently exist that necessitate the controlled use of ignition sources in the entirety of Emigration Canyon Metro Township. These conditions have existed in perpetuity given the location (mountainous, brush covered, forest covered, etc.) and as the Fire Code Official for Unified Fire, I recommend that your entity restrict ignition sources, including fireworks, and prohibit their use throughout the Emigration Canyon Metro Township.

Please feel free to contact our office should you have any questions.
