### PUBLIC COMMENTS

Ellen Birrell, Cottonwood Heights City Councilmember, commented on active transportation and transit. She says she understands the need to widen and accentuate arterials and collectors as the county and population has grown. She says she ran for office because she believes the time has come for Salt Lake County to go for a first-class transit system. She said the lightrail and FrontRunner have been wonderful improvements for north-south connections, but east-west connection is very poor and most workers cannot use the existing transit system to get to their place of work. She said the situation has only gotten worse during and post-COVID with skyrocketing housing prices; people can't live anywhere near where they work and the problem is only going to grow unless Salt Lake County focuses on transit alternatives to address this economic, air quality and public wellness problem. She asked the Commission to focus on and do all they can to use the existing asphalt in Salt Lake County, and give people a way to get out of their cars. She talked about repurposing strip mall parking lots and identifying places in the city to be mobility hubs to connect business, educational, shopping and entertainment districts to let people leave their vehicles closer to where they live.

Kye Nordfelt, representing Southern Utah Bicycle Alliance, asked for continued support for active transportation in the Southern Utah area, to focus on connectivity and give citizens the option of walking and biking as funding becomes available.

Utah House Representative Gay Lynn Bennion thanked UDOT and UTA for the work done during the unprecedented season of snow and avalanche danger. She commented on public and active transportation, saying that the transportation system of people in their own cars is causing feelings of isolation and loneliness. She talked about the importance of mental health and social well being with active transportation, saying we love to be together, but cars have driven us apart, not by anyone's fault, but by the system that was set up and inherited.

## **FHWA REPORT**

Brigitte Mandel, FHWA Deputy Division Administrator, reported that on April 12, FHWA published Notice of Renewed and Amended Memorandum of Understanding Assigning Environmental Responsibilities to the State of Utah and that comments will be accepted for 30 days following the publication in the Federal Register.

Brigitte also reported that FHWA released guidance on Implementation of the Ferry Boat Program as revised by the Bipartisan Infrastructure Law, which provides for an increased Federal share for projects to replace or retrofit a diesel fuel ferry vessel that provides substantial emissions reductions.

Brigitte reviewed the Request for Information (RFI) on the implementation of Section 60505: Environmental Review Implementation Funds of the Inflation Reduction Act, which provides \$100 million from FY22 General Funds, available until September 30, 2026, to the Federal Highway Administrator. Funds under this program may be made available to eligible entities to support environmental reviews of surface transportation projects. Through this RFI, FHWA is soliciting information and suggestions from the public and stakeholders across the public and private sectors on how best to facilitate FHWA's implementation of this provision.

Brigitte announced that \$21.8 million in discretionary grants was awarded to 33 National Scenic Byways Program projects in 29 states, including 28 DOTs and 5 Tribal projects. Utah's Patchwork Parkway (UPP) Interpretive Signage and Kiosk project was selected, and UDOT was awarded \$249,886 under the program

Brigitte reviewed the Notice of Funding Opportunity (NOFO) for the PROTECT Discretionary Grant Program for up to \$848 million. Applications are due August 18. She also reviewed a NOFO for the Reduction of Truck Emissions at Port Facilities (RTEPF) Grant Program for up to \$160 million, with the Federal share not to exceed 80% of the total cost of the project for which a grant was awarded. Applications are due June 26.

Brigitte reviewed the [USDOT's ROUTES running list of open NOFOs](#), as well as [the list of key upcoming NOFOs](#). All Federal grants, including transportation grants, can be found at [grants.gov](#).
